Architecture From Prehistory To Postmodernity Second Edition:

Architecture, from Prehistory to Postmodernity Marvin Trachtenberg, Isabelle Hyman, 2002 Moving back and forth between the long view of historical trends and close ups on major works and crucial architectural themes this insightful lively and original modern survey reinvigorates conventional period and thematic structures of architectural history and revitalizes the canon of great buildings Designed to help students understand and appreciate great architecture and its history the lavishly illustrated text explains specific qualities of periods in depth and the complex illuminating differences between them in social intellectual and aesthetic terms Exceptionally detailed coverage of the modern age 18th century to the present

Architecture, from Prehistory to Postmodernity Marvin Trachtenberg, Isabelle Hyman, 2002 Moving back and forth between the long shot on historical trends and close ups on major works and crucial architectural themes this insightful lively and original analysis also accepts the conventional period and thematic structures of architectural history and the canon of great buildings Designed to help readers understand and appreciate what great architecture is in its full dimensions of use structure and aesthetic qualities as well as its history this lavishly illustrated book explains specific qualities of each period and the often complex illuminating differences between the periods This comprehensive volume examines all aspects of architectural history from the Ancient world the Middle Ages the Renaissance and Baroque periods through the modern world For historians and architectural enthusiasts *Medieval Art Second Edition* Marilyn Stokstad, 2021-12-24 This beautifully produced survey of over a thousand years of Western art and architecture introduces the reader to a vast period of history ranging from ancient Rome to the age of exploration The monumental arts and the diverse minor arts of the Middle Ages are presented here within the social religious and political frameworks of lands as varied as France and Denmark Spain and Turkey Marilyn Stokstad also teaches her reader how to look at medieval art which aspects of architecture sculpture or painting are important and for what reasons Stylistic and iconographic issues and themes are thoroughly addressed with attention paid to aesthetic and social contexts [Architectonics and Parametric Thinking](#) Frank Jacobus, Angie

Carpenter, Rachel Smith Loerts, Antonello Nunzio, Francesco Bedeschi, 2023-07-12 This book is an approachable guide for students and professionals to learn parametric modeling through the lens of architectonics allowing readers to pair fundamental ideas about architecture with parametric thinking Architectonics and Parametric Thinking begins by clearly positioning the potentials of parametric design through a series of chapters written by leaders in their respective industries This helps to situate the vast potential of parametric softwares allowing the reader to understand the full range of what is made possible by working computationally Following this theoretical introduction the book presents a manual that walks readers through the step by step construction of parametric modeling scripts built through an architectonic lens using clear compelling diagrams Each of these diagrams provide textual accompaniment that describes how each new portion of the script is transforming the algorithm as a whole as well as diagrams that show the physical transformation that is taking place

as a result of the script's evolution Parametric modeling is radically transforming the design disciplines and will become the primary way designers generate new products moving forward Written and expertly designed for architecture students and professionals this book provides an interactive approach to teaching the basics of parametric thinking in relation to architecture and design

Architecture, from Prehistory to Post-modernism Marvin Trachtenberg, Isabelle

Hyman, 1986 History of buildings groups of buildings the styles in which they were built and the architects responsible for them from Stonehenge to the present

What Architecture Means Denise Costanzo, 2015-07-24 What Architecture Means introduces you to architecture and allows you to explore the connections between design ideas and values across time space and culture It equips you to play an active and informed role in architecture either as a professional or as a consumer client and citizen By analyzing famous and everyday buildings while presenting and questioning the positions of important architects and theorists this book will help you to evaluate and decide what qualities ideas and values you believe are important in architecture You'll learn How various definitions of architecture establish different relationships with all buildings and even non buildings How buildings express and accommodate ideas of the sacred the family and the community What an architect is and what priorities they bring to design and construction How an architect's expertise relates to that of the engineer and why these are distinct disciplines About values like beauty originality structural expression and cultural memory and their purpose in architectural design About the interests and ethical values that architects and architecture serves and promotes Topics include sacred spaces the house the city architects and engineers aesthetics and design

originality and method technology and form memory and identity and power and politics **Sacred Power, Sacred Space** Jeanne Halgren Kilde, 2008 The author's main concern in this book is the dynamic character of Christianity and how church buildings shape and influence the religion She argues that a primary function of church buildings is to represent and reify three different types of power divine power personal empowerment and social power

Understanding Architecture Leland M. Roth, 2018-03-13 This widely acclaimed beautifully illustrated survey of Western architecture is now fully revised throughout including essays on non Western traditions The expanded book vividly examines the structure function history and meaning of architecture in ways that are both accessible and engaging *Assembly by Design* Olga

Touloumi, 2024-09-10 How the United Nations headquarters became the architectural instrument and broadcast medium of global diplomacy For almost seven years after World War II a small group of architects took on an exciting task to imagine the spaces of global governance for a new political organization called the United Nations UN To create the iconic headquarters of the UN in New York City these architects experimented with room layouts media technologies and design in tribunal courtrooms assembly halls and council chambers The result was the creation of a new type of public space the global interior *Assembly by Design* shows how this space leveraged media to help the UN communicate with the world With its media infrastructure symbols acoustic design and architecture the global interior defined political assembly both inside and

outside the UN headquarters serving as the architectural medium to organize multilateral encounters of international publics around the globe Demonstrating how aesthetics have long held sway over political work Olga Touloumi posits that the building framed diplomacy on the ground amid a changing political landscape that brought the United States to the forefront of international politics destabilizing old and establishing new geopolitical alliances Uncovering previously closed institutional and family archives Assembly by Design offers new information about the political and aesthetic decisions that turned the UN headquarters into a communications organism It looks back at a moment of hope when politicians architects and diplomats believing that assembly was a matter of design worked together to deliver platforms for global democracy and governance

Architecture and the Image at the Turn of the 21st Century Sanja Rodeš, 2024-06-28 This book examines architecture image and media relationships as productive for architecture and architectural discourses By arguing that the relationships between architecture and media cannot be dismissed via linear criticism of architecture and media or image these relations are instead seen as a part of a sphere a mediasphere of complex relationships In lieu of anything like a consensus on the contemporary condition of architecture referring to the late twentieth and the twenty first centuries the starting point of this book is that the relationships between architecture media and images continue to multiply owing to continuous technological advancements Contemporary architecture considered in this book is related to the selected circumstances of high visibility where architectural images are propelled into visibility and conflated with non architectural images This takes architecture outside of architectural only discourse and into the public realm By granting higher visibility to both the architectural images and architecture in the public realm architecture can also be influenced by the various perceptions of the general public and can enter public consciousness via non architectural media With increased visibility architecture's far reaching presence calls for more structured analysis of its nature and potential As the analysed architecture in this book is associated with the discourses outside of architecture some of which relate to terrorism natural disaster and branding and consumption the limits of contemporary architectural discipline are questioned and extended This book is written for academics and students in architectural history theory and criticism particularly those interested in visual and media studies
