What's the Least I Can Believe and Still be a Christian? Martin Thielen,2013-01-01 Pastor and author Martin Thielen has compiled a list of ten things people need to believe and ten things they don t in order to be a Christian This lively and engaging book will be a help to seekers as well as a comfort to believers who may find themselves questioning some of the assumptions they grew up with With an accessible storytelling style that s grounded in solid biblical scholarship Thielen shows how Christians don t need to believe that sinners will be left behind to burn in hell or that it s heresy to believe in evolution And while we must always take the Bible seriously we don t always have to take it literally At the same time Christians do need to believe in Jesus his life his teachings his death and resurrection and his vision for the world A great benefit of those beliefs is that they provide promising answers to life s most profound questions including Where is God What matters most What brings fulfillment What about suffering Is there hope Thielen articulates centrist mainline Christianity in a way that s fresh and easy to understand and offers authentic Christian insights that speak to our deepest needs This new edition includes a leader s guide previously only available online and a new introduction from the author that reflects on the book s reception The leader s guide features unique and easily implemented aids for carrying out a seven week congregation

Byrne,2016-03-21 Learner centered teaching is a pedagogical approach that emphasizes the roles of students as participants in and drivers of their own learning Learner centered teaching activities go beyond traditional lecturing by helping students construct their own understanding of information develop skills via hands on engagement and encourage personal reflection through metacognitive tasks In addition learner centered classroom approaches may challenge students preconceived notions and expand their thinking by confronting them with thought provoking statements tasks or scenarios that cause them to pay closer attention and cognitively see a topic from new perspectives Many types of pedagogy fall under the umbrella of learner centered teaching including laboratory work group discussions service and project based learning and student led research among others Unfortunately it is often not possible to use some of these valuable methods in all course situations given constraints of money space instructor expertise class meeting and instructor preparation time and the availability of prepared lesson plans and material Thus a major challenge for many instructors is how to integrate learner centered activities widely into their courses The broad goal of this volume is to help advance environmental education practices that help increase students environmental literacy Having a diverse collection of learner centered teaching activities is especially useful for helping students develop their environmental literacy because such approaches can help them connect more personally with the material thus increasing the chances for altering the affective and behavioral dimensions of their environmental literacy This volume differentiates itself from others by providing a unique and diverse collection of classroom activities that can help students develop their knowledge skills and personal views about many contemporary environmental and sustainability issues Teaching for Learning Claire Howell Major,Michael S. Harris,Todd D. Zakrajsek,2015-08-27

Despite a growing body of research on teaching methods instructors lack a comprehensive resource that highlights and synthesizes proven approaches Teaching for Learning fills that gap Each of the one hundred and one entries describes an approach and lists its essential features and elements demonstrates how that approach has been used in education including specific examples from different disciplines reviews findings from the research literature describes techniques to improve effectiveness Teaching for Learning provides instructors with a resource grounded in the academic knowledge base written in an easily accessible engaging and practical style *Reading Programs for Young Adults* Martha Seif Simpson,2015-11-16

includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs Physics for Scientists and Engineers Raymond A.
