Apparel Merchandising The Line Starts Here:

Apparel Merchandising Jeremy A. Rosenau, David L. Wilson, 2001-12-01 Apparel Merchandising The Line Starts Here is a comprehensive approach to apparel merchandising from the perspective of the apparel producer. Rosenau and Wilson draw on their extensive backgrounds in the industry as senior and chief executives covering men's tailored clothing, men's and women's sportswear and activewear, and children's wear in both domestic and international markets. This practical industry expertise and access to industry resources combined with their experience in higher education give them a unique perspective to create a focused and stimulating textbook unlike any currently available. This text follows the evolution of the merchandising function from its historic roots in two seasons per year and minimal style changes with emphasis on production efficiency to today's seasonless, consumer-driven, fashion-oriented, real-time global market. This entails a focus on product development and the philosophies and perspective of industry executives. Finally, the authors capture the interface of merchandising with the marketing and manufacturing departments and the way these functions integrate in an effective team concept. Instructor's Guide includes course syllabus, answers to discussion questions and activities, and project ideas.

Henninger, 2020-05-10 Fashion buying and merchandising has changed dramatically over the last 20 years. Aspects such as the advent of new technologies and the changing nature of the industry into one that is faster paced

than ever before as well as the shift towards more ethical and sustainable practices have resulted in a dramatic change of the roles. As a result, contemporary fast fashion retailers do not follow the traditional buying cycle processes step by step; critical paths are wildly different and there has been a huge increase in in-season buying as a response to heightened consumer demand. This textbook is a comprehensive guide to 21st century fashion buying and merchandising, considering fast fashion, sustainability, ethical issues, omnichannel retailing, and computer-aided design. It presents an up-to-date buying cycle that reflects key aspects of fashion buying and merchandising as well as in-depth explanations of fashion product development, trend translation, and sourcing. It applies theoretical and strategic business models to buying and merchandising that have traditionally been used in marketing and management. This book is ideal for all fashion buying and merchandising students, specifically second and final year undergraduate as well as MA/MSc fashion students. It will also be useful to academics and practitioners who wish to gain a greater understanding of the industry today.

Sizing in Clothing S. Ashdown, 2007-04-11. The basic concepts behind sizing systems currently used in the manufacture of ready-to-wear garments were originally developed in the 19th century. These systems are frequently based on outdated anthropometric data; they lack standard labelling and they generally do not accommodate the wide variations of body sizes and proportions that exist in the population. However, major technological improvements have made new population data available worldwide with the potential to affect the future of sizing in many ways. New developments in computer-aided design and sophisticated mathematical and statistical methods of categorizing different body shapes can also contribute to the development of more effective sizing systems. This important book provides a critical appreciation of the key technological and scientific developments in sizing and their application. The first chapter in the book discusses the history of sizing systems and how this has affected the mass production of ready-to-wear clothing. Chapters two and three review methods for constructing new and adapting existing sizing systems and the standardisation of national and international sizing systems. Marketing and fit models are reviewed in chapter four, whilst chapter five presents an analysis of the grading process used to create size sets. Chapters six and seven discuss fit and sizing strategies in relation to function and the communication of sizing. Mass customization and a discussion of material properties and their effect on sizing are addressed in chapters eight and nine. Military sizing and the aesthetics of sizing are detailed in chapters ten and eleven. The final

chapter reviews the impact on sizing of production systems and specifications Written by an international team of contributors this book is an essential reference to researchers designers students and manufacturers in the clothing and fashion industry Provides a critical appreciation of key technological and scientific developments in sizing and their application Discusses how developments in sizing affect the mass production of ready to wear clothing Reviews methods of constructing new and adapting existing sizing systems
