Hollow Land: Israel's Architecture of Occupation Eyal Weizman, 2012-08-07 Acclaimed exploration of the political space created by Israel s colonial occupation In this journey from the deep subterranean spaces of the West Bank and Gaza to their militarized airspace Eyal Weizman unravels Israel s mechanisms of control and the transformation of the Occupied Territories into an artifice in which all natural and built features function as the instruments of occupation Weizman identifies the ideas behind this phenomenon and traces their development from the influence of archaeology on urban planning Ariel Sharon s reconceptualization of military defense during the 1973 war through the planning and architecture of the settlements to the contemporary Israeli discourse and practice of urban warfare and airborne targeted assassinations In exploring Israel s methods to transform the landscape and the built environment themselves into tools of domination and control *Hollow Land* lays bare the political system at the heart of this complex and terrifying project of late modern colonial occupation **Women Architects and Politics** Mary Pepchinski, Christina Budde, 2022-09-27 In the late 1960s the feminist scholar Kate Millet broadly defined politics as arrangements of power which enable individuals collectively to assert authority over others Taking this definition case studies by scholars from Europe Israel and the United States explore the gendered professional in the 20th century as she navigated arrangements of power including organised religion emancipation movements cultural norms and shifting forms of government to practice architecture Additional contributions

Lindstrom, 2024-06-25 Challenging mainstream architecture's understandings of place this book offers an illuminating clarification that allows the idea's centrality in all aspects of everyday design thinking to be rediscovered or considered for the first time Rigorous but not dense practical but not trivialising the book unfolds on three fronts First it clearly frames the pertinent aspects of topology the philosophy of place importantly differentiating two concepts that architecture regularly conflates place and space Second it rejects the ubiquitous notion that architecture makes place and instead reasons that place is what makes architecture and the built environment possible that place calls for and to architecture and that architecture is thus invited to listen and respond Finally it turns to the matter of designing responses that result not just in more places of architecture demanding little of design nor merely in architecture with some sense of place demanding little more but rising above those responses that constitute an architecture of place demanding the greatest vigilance but offering the utmost freedom Opening up a term regarded as so common that its meaning is seldom considered the author reveals the actual depth and richness of place its innateness to architecture and its essentiality to practitioners clients educators and students including those in all spatial disciplines
