Early Ethnography in the American Arctic Kirsten Hastrup, 2023-10-19 This book offers a portrait of early ethnographic work in the American Arctic with a focus on understanding the mutual constitution of the Inuit and their early ethnographers. It draws mainly on a rich repository of written testimonies from the early twentieth century, the great ethnographic period when new scholarly interest in the region took off. Supplementing the movements and observations of whalers, traders, and missionaries, the early chroniclers offered new knowledge of Inuit life. Although their descriptions of the Inuit bear the marks of their time, the texts have left a deep mark on later developments and contributed to a long-lasting view of human life in the Arctic. The chapters show the infiltration of lives and landscapes of thoughts and materials of Inuit and ethnographers. The book will be relevant to anthropologists as well as historians, geographers, and others with an interest in the Arctic region and Indigenous studies.

Folk Mammalogy of the Northern Pimans Amadeo M. Rea, 2016-12-15 Knowledge held about animals by Pima-speaking Native Americans of Arizona and northwest Mexico is intimately entwined with their way of life, a way that is fading from memory as beavers and wolves vanish also from the Southwest. Ethnobiologist Amadeo Rea has conducted extensive fieldwork among the Northern Pimans and here shares what these people know about mammals and how mammals affect their lives. Rea describes the relationship of the River Pima, Tohono O'odham, Papago Pima, and Mountain Pima to the furred creatures of their environment, how they are named and classified, hunted, prepared for consumption, and incorporated into myth. He also identifies associations between mammals and Piman notions of illness by establishing correlations between the geographical distribution of

mammals and ideas regarding which animals do or do not cause staying sickness This information reveals how historical and ecological factors can directly influence the belief systems of a people At the heart of the book are detailed species accounts that relate Piman knowledge of the bats rabbits rodents carnivores and hoofed mammals in their world encompassing creatures ranging from deer mouse to mule deer cottontail to cougar Rea has been careful to emphasize folk knowledge in these accounts by letting the Pimans tell their own stories about mammals as related in transcribed conversations This wide reaching study encompasses an area from the Rio Yaqui to the Gila River and the Gulf of California to the Sierra Madre Occidental and incorporates knowledge that goes back three centuries Folk Mammalogy of the Northern Pimans preserves that knowledge for scholars and Pimans alike and invites all interested readers to see natural history through another people's eyes

Evangelicalism and the Politics of Reform in Northern Black Thought, 1776-1863 Rita Roberts, 2011 During the revolutionary age and in the early republic when racial ideologies were evolving and slavery expanding some northern blacks surprisingly came to identify very strongly with the American cause and to take pride in calling themselves American In this intriguing study Rita Roberts explores this phenomenon and offers an in depth examination of the intellectual underpinnings of antebellum black activists She shows how conversion to Christianity led a significant and influential population of northern blacks to view the developing American republic and their place in the new nation through the lens of evangelicalism American identity therefore even the formation of an African ethnic community and later an African American identity developed within the evangelical and republican ideals of the revolutionary age Evangelical values Roberts contends exerted a strong influence on the strategies of northern black reformist activities specifically abolition anti racism and black community development The activists and reformers commitment to the United States and firm determination to make the country live up to its national principles hinged on their continued faith in the possibility of the collective transformation of all Americans The people of the United States both black and white they believed would become a new citizenry distinct from any population in the world because of their commitment to the tenets of the Christian republican faith Roberts explores the process by which a collective identity formed among northern free blacks and notes the ways in which ministers and other leaders established their African identity through an emphasis on shared oppression She shows why in spite of slavery's expansion in the 1820s and 1830s northern blacks demonstrated more not less commitment to the nation Roberts then examines the Christian influence on racial theories of some of the major abolitionist figures of the antebellum era including Frederick Douglass Martin Delany and especially James McCune Smith and reveals how activists sense of their American identity waned with the intensity of American racism and

the passage of laws that further protected slavery in the 1850s But the Civil War and Emancipation Proclamation she explains renewed hope that America would soon become a free and equal nation Impeccably researched Evangelicalism and the Politics of Reform in Northern Black Thought 1776 1863 offers an innovative look at slavery abolition and African American history *The First Print Era* Daniel Fried,2023-12-05 The First Print Era examines the rise of print culture during China s Northern Song Dynasty 960 1127 Bringing together often overlooked primary sources from the period and scholarship on many individual topics in Song print history the book offers the first extended narrative in English of how print became entrenched as a sustained mode of textual dissemination in China While discussing technical innovations and the growth of the print industry the book focuses on how the rise of print affected several indispensable elements of Song intellectual culture the expansion of the exam system the canonization of Tang and earlier models the rise of antiquarianism and connoisseurship the birth of Neo Confucianism as a new intellectual force the growth of a new literati culture and new forms of literary production and critique and the development of calligraphy as an art form that could be taught critiqued and divided into schools Overall the book describes a process by which print publication moved from a highly centralized state enterprise back to expanded elite use and eventually towards the popular print markets that would create new forms of expression during the Southern Song and Yuan dynasties This book will be an essential read for students and scholars of Asian studies Medieval studies and those with a focus on print history and Chinese studies
