[Africa's digital future](#) Ali Parry, Susara J. Jansen van Rensburg, 2021-12-31 The main thrust of this book is to examine whether Africa is in a position to benefit from the digital age given the continent's many development challenges and slow adoption of digital technologies While there is substantial literature on the digital economy and the quickening pace of the Fourth Industrial Revolution 4IR comparatively little research has been conducted on what the digital age means for Africa This book aims to close this research gap by using various qualitative and quantitative research methodologies to arrive at a cross section of original findings and perspectives on how Africa can capitalise on the benefits of digital developments including their potential to create jobs and bring about more inclusive growth The book's main contribution is its coverage of a range of topics that will affect Africa's digital future including industrialisation global value chains transport and logistics trade facilitation labour market dynamics employment and education The theme of digital trade forms a backdrop to many of the chapters along with references to the COVID 19 pandemic The book acknowledges that although African countries should learn from international best practices they need to

chart their own course according to their own particular circumstances By adopting a digital mindset countries should be able to diversify economically and extend their market reach across the continent Furthermore while Africa should be looking to the future and determining how digital technologies can become effective tools of sustainable development the continent has much catching up to do

Philosophy and African Development Lansana Keita, 2011-04-14 Philosophy and African Development Theory and Practice appraises development in a holistic manner It goes beyond the usual measurement in terms of economic achievement and widens the scope to include the impact that history of ideas political theory sociology social and political philosophy and political economy have had on development in Africa It is a departure from the traditional treatment of development by economists who point towards the so called time tested assertions and recommendations for sustainable development but which are yet bring about significant change in the economies of the so called developing societies It is on account of the failures of the economic development theory with its tepid prescriptions for sustainable development and poverty reduction that theories of development have now been expanded from mere economic analysis to include considerations of history sociology political economy and anthropology as could be discovered in this book Most of the contributions in this book have been prepared by philosophers across Africa and the United States who implicitly practise their discipline as one whose most effective modern function would be to appraise the human experience in all its dimensions from the standpoints of modern social and natural sciences all disciplinary offspring of philosophy itself With chapters ranging from issues of modernity and religious interpretations the human right to development the idea of African time the primacy of mental decolonisation and the type of education offered in Africa today and as a tool for development to development planning science technology and globalisation as well as issues of post coloniality among others The tenor of the contributions is not only proportional but also engaged in the meta analysis of the theories on which the concept of development is founded and practised This book is strongly recommended as a useful text in the hands of scholars researchers and students of development studies It approaches the important issue of African development from the broad perspective of the social sciences in general and buttresses this with the keen analytical approach of its contributors
