Supernormal Growth: China's Economy 1979-2049 Jeffrey Zhengfu Shi, 2015-12-30 Supernormal Growth confirms the supernormal achievements of China by providing founding statistics that China during the past 35 years experienced a synchronous high speed growth of investment consumption labor productivity with low volatility First of its kind Jeffrey Shi analyzes the unique structure and operating mechanism of China's existing market economy from a theoretic

perspective and attributes China's supernormal growth to supernormal investment aroused by China's three dimensional 3 D market system which consists of competitive enterprises competitive local governments and central government and to supernormal purchasing power created by American's finance driving strategy In examining multiple challenges of China one by one the Shi proposes a whole conception of national strategic asset investment system which does not interfere with the operation of normal market but provides sustainable extra force to extend China's supernormal growth and also an innovative idea of relieving polarization of the poor and the rich through a 1 5th income distribution system so as to provide a panoramic view of China's supernormal growth strategy in the next 30 years Shi is not only a respected scholar but also a successful businessman giving Supernormal Growth a more valuable reference in answering many questions about China's development no matter in the past or future

Global Impact of Unconventional Energy Resources

Manochehr Dorraj,Ken Morgan,2018-11-26 The chapters in this volume represent the latest thinking on the development and exploration of unconventional energy resources in the U S Canada Australia Europe Russia Asia Pacific Middle East Latin America and Africa and shed light on its potential and future prospects in these respective regions The diversity of thinking about the shale revolution is also evident in our case studies Throughout many countries in Europe for example there is a strong preference for investment in renewable sources of energy over the fossil fuels In addition to environmental concerns the

falling price of renewables have also made them more attractive financially. Consequently, global investment in renewables is outpacing that of fossil fuel two to one. Watching this trend in 2017, the Chinese government has pledged to invest 360 billion on renewable energy. This would make China the largest investor in development of renewables in the world. Other obstacles to development of shale oil and gas in other parts of the world include lack of adequate shale resources. Africa, the abundance of conventional energy resources, Middle East and North Africa, high cost of production, Russia, China, Japan, and political opposition to hydraulic fracturing, France, and Poland. Despite these sentiments, the economic imperatives providing employment also play a significant role in determining the future prospects for unconventional energy resources globally.

War or Peace Deepak Lal, 2018-05-22. Today's international climate is one of disorder. A League of Dictators, China, Russia, Iran, is threatening the superpower status of the United States of America and the liberal international order it has underwritten. A piecemeal Third World War seems to have begun. Eminent economist Deepak Lal argues that the global financial crisis was the proximate cause for a revanchist China and Russia, believing that the liberal economic order promoted by the US was on its deathbed and their illiberal systems were the future. But Lal argues that reports of the economic woes of the US are greatly exaggerated, as are those of China's prospects and Russia's power. With a new regime and the US continuing overwhelming economic and military strength, it can maintain its global hegemony by challenging the League of Dictators. India is increasingly a partner in this effort to maintain a liberal global order by helping contain China's burgeoning influence.
