Architecture 3.0 Cliff Moser, 2013-12-04 This book provides a definitive guide for the future direction of the practice and profession of architecture In five parts Cliff Moser provides you with all the tools and know how to implement changes that will serve you and your practice in the short medium and long term Written at a crucial time for the industry this is essential reading for every architect

The Disruptors Dennis R. Shelden, 2020-06-08 Technology driven disruption and entrepreneurial response have become profound drivers of change in modern culture Wholly new organisations have rapidly emerged in many fields including retail print media and transportation often dramatically altering both the products and processes that define these industries Architecture has until now been minimally impacted by this technologically driven upheaval But there are many signs that this period of tranquillity is ending Startups are proliferating targeting diverse innovations from environmental performance to large scale 3D printing Traditional architecture and engineering firms are creating incubators and spin offs to capitalise on their innovations Large and innovative organisations from outside the professions are becoming interested in the built environment as the next platform for technological and economic disruption These new directions for the discipline will potentially create radically new types of practice new building typologies and new ways for both design professionals and societies to engage with the built environment It is crucial that architectural discourse addresses these possibilities and begins to embrace technology driven entrepreneurship as a central theme for the future of architectural practice Contributors Sandeep Ahuja Ben van Berkel Phil Bernstein Helen Castle James Cramer and Scott Simpson Craig Curtis David Fano and Daniel Davis Greg Lynn Jessica Rosenkrantz and Jesse Louis Rosenberg Brad Samuels Marc Simmons Jared Della Valle and Philip F Yuan and Chao Yan Featured architects Archi Union Ayre Chamberlain Gaunt Bryden Wood Gehry Partners Front Greg Lynn FORM Millar Howard Workshop Nervous System SITU and UNStudio

Subject Guide to Books in Print ,1991 *The Commons* Vangelis

Papadimitropoulos,2020-10-20 This book explores the potential creation of a broader collaborative economy through commons based peer production P2P and the emergent role of information and communication technologies ICTs The book seeks to critically engage in the political discussion of commons based peer production which can be classified into three basic arguments the liberal the reformist and the anti capitalist This book categorises the liberal argument as being in favour of the coexistence of the commons with the market and the state Reformists on the other hand advocate for the gradual adjustment of the state and of capitalism to the commons while anti capitalists situate the commons against capitalism and the state By discussing these three viewpoints the book contributes to contemporary debates concerning the future of commons based peer production Further the author argues that for the commons to become a fully operational mode of peer production it needs to reach critical mass arguing that the liberal argument underestimates the reformist insight that technology has the potential to decentralise production thereby forcing capitalism to transition to post capitalism Surveying the three main strands of commons based peer production this book makes the case for a post capitalist commons orientated transition that moves beyond neoliberalism *El-Hi Textbooks in Print* ,1982 *British Paperbacks in Print* ,1984

Theorizing the Sharing Economy Indre Maurer,Johanna Mair,Achim Oberg,2020-04-10 This volume takes advantage of this opportunity by presenting a collection of empirical and conceptual work that explores the variety and the trajectories of new forms of organizing in the sharing economy and in doing so builds on rejuvenates and refines existing organization theories *Forthcoming Books* Rose Arny,1996-06
