Modern Architecture and an International

Sensibility Naina Gupta, 2025-05-30 *Modern Architecture and an International Sensibility* A Curious Cross Atlantic Constellation presents an alternative history of internationalism and modernism with a focus on the role of architecture and spatial practices Beginning at the tail end of the peace movements the turn of the twentieth century and ending with the Nuremberg trials the book highlights the part played by individual agency social reform and architecture in moulding a working everyday definition of what it meant to be international during this time By viewing internationalism through the lens of the individual and the body both as initiator and subject it is repositioned as an integral part of everyday life rather than simply understood to be concerned with geopolitical relations between nations and their institutions The book furthers a research methodology that is multidisciplinary and transnational It will therefore be of interest to researchers and students of architecture and international history

Architecture and Dystopia

Dario Donetti, 2020-02-08 A homage to the 1973 publication of *Architecture and Utopia* by Manfredo Tafuri echoed in the title this book is devoted to the radical experiences of the 1960s and to their consequences for the most recent developments in contemporary architecture As a response to the profound crisis of Western culture that emerged in the 1960s radical artists from Italy Austria England and Japan called into question the foundations of modernist utopias They transmuted the difficulties of capitalism into a repertory of startling images that revealed the disturbing realities of consumer society even in those places still resistant to the penetration of

modern architecture such as Superstudio and Archizoom's Florence Their model though exhausted in the space of experimentation went on to inspire a generation of architects from the High Tech movement to Rem Koolhaas who sought to employ the paradigm of dystopia as both a visionary and a constructive method one which could operate on the architecture of late capitalism and generate unexpected possibilities for urban planning In the light of these examples how to define a unified dystopian method of design i.e. a common ground for an architecture that by its very nature seems to resist systematization Are the most recognizable architectural expressions of this theoretical framework characterized by brazen displays of technology and structures of overwhelming scale merely isolated cases albeit of particular iconic power Or do they belong to a wider landscape of antirational architectural projects And to what extent are these disturbing expressions premised on the utopian tradition or better yet the conceptual model of negative thought The goal of this book is to respond to such questions thus initiating an open dialogue about the legitimacy of this critical category With contributions by Dario Donetti Marco De Michelis Oliver Elser Dominique Rouillard Marco Biraghi Marie Theres Stauffer Maddalena Scimemi Simon Sadler Massimiliano Savorra and Anthony Vidler Architecture and Videogames Vincent Hui, Ryan Scavnicky, Tatiana Estrina, 2025-02-04 This book explores and affirms the emergent symbiosis between videogames and architecture including insights from a diverse range of disciplines With contributions from authorities in both architecture and videogame industries it examines how videogames as a medium have enlightened the public about the built environments of the past offered heightened awareness of our current urban context and presented inspiration for the future directions of architecture A relatively nascent medium videogames have rapidly transitioned from cultural novelty to architectural prophet over the past 50 years That videogames serve as an interactive proxy for the real world is merely a gateway into just how pervasive and potent the medium is in architectural praxis If architecture is a synthesis of cultural value and videogames are a dominant cultural medium of today how will they influence the architecture of tomorrow The book is split into seven sections Cultural Artifacts Historic Reproduction Production Technologies Design Pedagogy Proxies and Representation Bridging Worlds and Projected Futures **Reinventing STEM in Early Childhood Education** Eugene Geist, 2025-05-09 Teaching STEM to young children is about more than helping them learn their numbers and facts It is an important and complex process that to be effective should honor the way children's brains are developing This book outlines how early childhood educators can best support young children's STEM journeys as children naturally take in information about their environment synthesize it and grow in the process This comprehensive text details different theories of learning research on how young brains develop practical information on preparing your environment and yourself for teaching STEM to children guidance for supporting diverse populations of students and developmental guidelines sample standards resources and lesson plans Organized chronologically the book connects relevant STEM topics with each developmental age range and outlines common school standards for each grade Reinventing STEM in Early Childhood Education is meant to be

a core text for preservice teachers in math and science methods courses and is also important reading for teacher educators and professional development programs

Playing Place Chad Randl, D. Medina Lasansky, 2023-08-15 An essay collection exploring the board game's relationship to the built environment revealing the unexpected ways that play reflects perceptions of space Board games harness the creation of entirely new worlds From the medieval warlord to the modern urban planner players are permitted to inhabit a staggering variety of roles and are prompted to incorporate preexisting notions of placemaking into their decisions To what extent do board games represent the social context of their production How might they reinforce or subvert normative ideas of community and fulfillment In *Playing Place* Chad Randl and D Medina Lasansky have curated a collection of thirty seven fascinating essays supplemented by a rich trove of photo illustrations that unpack these questions with breadth and care Although board games are often recreational objects their mythologies and infrastructure do not exist in a vacuum rather they echo and reproduce prevalent cultural landscapes This thesis forms the throughline of pieces reflecting on subjects as diverse as the rigidly gendered fantasies of classic mass market games the imperial convictions embedded in games that position player protagonists as conquerors establishing dominion over their discoveries and even the uncanny prescience of games that have players responding to a global pandemic Representing a thrilling convergence of historiography architectural history and media studies scholarship *Playing Place* suggests not only that tabletop games should be taken seriously but also that the medium itself is uniquely capable of facilitating our critical consideration of structures that are often taken for granted

Deconstructing LEGO Jonathan Rey Lee, 2020-09-08 This book investigates a paradox of creative yet scripted play how LEGO invites players to build freely with and within its highly structured ideologically laden toy system First this book considers theories and methods for deconstructing LEGO as a medium of bricolage the creative reassembly of already significant elements Then it pieces together readings of numerous LEGO sets advertisements videogames films and other media that show how LEGO constructs five ideologies of play construction play dramatic play digital play transmedia play and attachment play From suburban traffic patterns to architectural croissants from feminized mini doll bodies to toys to life stories from virtual construction to playful fan creations this book explores how the LEGO medium conveys ideological messages not by transmitting clear statements but by providing implicit instructions for how to reassemble meanings it had all along

Women Architects at Work Mary Anne Hunting, Kevin D. Murphy, 2025-02-18 A comprehensive history of the women architects who left their enduring mark on American Modernism In the decades preceding World War II professional architecture schools enrolled increasing numbers of women but career success did not come easily *Women Architects at Work* tells the stories of the resilient and resourceful women who surmounted barriers of sexism racism and classism to take on crucial roles in the establishment and growth of Modernism across the United States Mary Anne Hunting and Kevin D Murphy describe how the Cambridge School of Architecture and Landscape Architecture in Massachusetts evolved for the professional education of

women between 1916 and 1942 While alumnae such as Eleanor Agnes Raymond Victorine du Pont Homsey and Sarah Pillsbury Harkness achieved some notoriety others like Elizabeth Ann Campbell Knapp and Louisa Vaughan Conrad have been largely absent from histories of Modernism Hunting and Murphy describe how these innovative practitioners capitalized on social educational and professional ties to achieve success and used architecture to address social concerns including how modernist ideas could engage with community and the environment Some joined women led architectural firms while others partnered with men or contributed to Modernism as retailers of household furnishings writers and educators photographers and designers or fine artists With stunning illustrations *Women Architects at Work* offers new histories of recognized figures while recovering the stories of previously unsung women all of whom contributed to the modernization of American architecture and design
