Architecture After Revolution:

Architecture After Revolution Alessandro Petti, Sandi Hilal, Eyal Weizman, 2013-09-06 The work presented in this book is an invitation to undertake an urgent architectural and political thought experiment to rethink today's struggles for justice and equality not only from the historical perspective of revolution but also from that of a continued struggle for decolonization consequently to rethink the problem of political subjectivity not from the point of view of a Western conception of a liberal citizen but rather from that of the displaced and extraterritorial refugee Located on the edge of the desert in the town of Beit Sahour in Palestine the architectural collective Decolonizing Architecture Art Residency DAAR has since 2007 combined discourse spatial intervention collective learning public meetings and legal challenges to open an arena for speculating about the seemingly impossible the actual transformation of Israel's physical structures of domination

Architecture After Deleuze and Guattari Chris L. Smith, 2023-05-04 This study illuminates the complex interplay between Deleuze and Guattari's philosophy and architecture Presenting their wide ranging impact on late 20th and 21st century architecture each chapter focuses on a core Deleuzian Guattarian philosophical concept and one key work of architecture which evokes contorts or extends it Challenging the idea that a concept or theory defines and then produces the physical work and not vice versa Chris L Smith positions the relationship between Deleuze and Guattari's philosophy and the field of architecture as one that is mutually substantiating and constitutive In this framework modes of architectural production and experimentation become inextricable from the conceptual territories defined by these two key thinkers producing a rigorous discussion of theoretical practical and experimental engagements with their ideas

Architecture and Revolution Neil Leach, 2003-09-02 Architecture and Revolution explores the consequences of the 1989 revolutions in Central and Eastern Europe from an architectural perspective It presents new writings from a team of renowned architects philosophers and cultural theorists from both the East and the West They explore the questions over the built environment that now face architects planners and politicians in the region They examine the problems of buildings inherited from the communist era some are environmentally inadequate many were designed to serve a now redundant social programme and others carry the stigma of association with previous regimes Contributors include Daniel Libeskind Bernard Tschumi Laura Mulvey Helene Cixous Andrew Benjamin and Frederic Jameson

Architecture as Revolution Luis E. Carranza, 2010-06-15 The period following the Mexican Revolution was characterized by unprecedented artistic experimentation Seeking to express the revolution's heterogeneous social and political aims which were in a continuous state of redefinition architects artists writers and intellectuals created distinctive sometimes idiosyncratic theories and works Luis E Carranza examines the interdependence of modern architecture in Mexico and the pressing sociopolitical and ideological issues of this period as well as the interchanges between post revolutionary architects and the literary philosophical and artistic avant gardes Organizing his

book around chronological case studies that show how architectural theory and production reflected various understandings of the revolution's significance Carranza focuses on architecture and its relationship to the philosophical and pedagogic requirements of the muralist movement the development of the avant garde in Mexico and its notions of the Mexican city the use of pre Hispanic architectural forms to address indigenous peoples the development of a socially oriented architectural functionalism and the monumentalization of the revolution itself In addition the book also covers important architects and artists who have been marginally discussed within architectural and art historiography Richly illustrated *Architecture as Revolution* is one of the first books in English to present a social and cultural history of early twentieth century Mexican architecture

Changing Ideals in Modern Architecture, 1750-1950 Peter Collins, 1998 *Changing Ideals in Modern Architecture* revolutionized the understanding of modernism in architecture pushing back the sense of its origin from the early twentieth century to the 1750s and thus placing architectural thought within the a broader context of Western intellectual history This new edition of Peter Collins's ground breaking study includes all seventy two illustrations of the original hard cover edition which has been out of print since 1967 and restores the large format

A History of American Architecture Mark Gelernter, 2001 Presents a history of American architecture from the first civilizations in America to the present

Architecture on the Borderline Anoma Pieris, 2019-06-25 *Architecture on the Borderline* interrogates space and territory in a turbulent present where nation state borders are porous to a few but impermeable to many It asks how these uneven and conflicted social realities are embodied in the physical and material conditions imagined produced or experienced through architecture and urbanism Drawing on historical global examples this rich collection of essays illustrates how empires nations and cities expand their frontiers and contest boundaries but equally how borderline identities of people and places influence or expose these processes Empirical chapters covering Central Asia the Asia Pacific region the American continent Europe and the Middle East offer multiple critical insights into the ways in which our spatial imagination is contingent on border thinking on the ways of being and navigating frontiers boundaries and margins the three themes used to organise their content The underlying premise of the book is that sensitisation to border conditions can alter our understanding of the static physical spaces that service political or cultural ideologies and that the view from the periphery opens up new ways of understanding sovereignty In exploring these various spaces and their transformative subjectivities this book also reveals the unrelenting precarity of contesting and living on the margins and related spaces and discourses that are neglected or suppressed
