Rocha, David Tanar, Bernady O. Apduhan, Eufemia Tarantino, 2019-06-28 The six volumes LNCS 11619 11624 constitute the refereed proceedings of the 19th International Conference on Computational Science and Its Applications ICCSA 2019 held in Saint Petersburg Russia in July 2019 The 64 full papers 10 short papers and 259 workshop papers presented were carefully reviewed and selected from numerous submissions The 64 full papers are organized in the following five general tracks computational methods algorithms and scientific applications high performance computing and networks geometric modeling graphics and visualization advanced and emerging applications and information systems and technologies The 259 workshop papers were presented at 33 workshops in various areas of computational sciences ranging from computational science technologies to specific areas of computational sciences such as software engineering security artificial intelligence and blockchain technologies

Software Engineering Perspectives and Application in Intelligent Systems Radek Silhavy, Roman Senkerik, Zuzana Kominkova Oplatkova, Petr Silhavy, Zdenka Prokopova, 2016-04-26 The volume Software Engineering Perspectives and Application in Intelligent Systems presents new approaches and methods to real world problems and in particular exploratory research that describes novel approaches in the field of Software Engineering Particular emphasis is laid on modern trends in selected fields of interest New algorithms or methods in a variety of fields are also presented The 5th Computer Science On line Conference CSOC 2016 is intended to provide an international forum for discussions on the latest research results in all areas related to Computer Science The addressed topics are the theoretical aspects and applications of Computer Science Artificial Intelligences Cybernetics Automation Control Theory and Software Engineering

NEO 2016 Yazmin Maldonado, Leonardo Trujillo, Oliver Schütze, Annalisa Riccardi, Massimiliano Vasile, 2017-09-12 This volume comprises a selection of works presented at the Numerical and Evolutionary Optimization NEO 2016 workshop held in September 2016 in Tlalneantla Mexico The development of powerful search and optimization techniques is of great importance in today's world and requires researchers and practitioners to tackle a growing number of challenging real world problems In particular there are two well established and widely known fields that are commonly applied in this area i

traditional numerical optimization techniques and ii comparatively recent bio inspired heuristics Both paradigms have their unique strengths and weaknesses allowing them to solve some challenging problems while still failing in others The goal of the NEO workshop series is to bring together experts from these and related fields to discuss compare and merge their complementary perspectives in order to develop fast and reliable hybrid methods that maximize the strengths and minimize the weaknesses of the underlying paradigms In doing so NEO promotes the development of new techniques that are applicable to a broader class of problems Moreover NEO fosters the understanding and adequate treatment of real world problems particularly in emerging fields that affect all of us such as healthcare smart cities big data among many others The extended papers presented in the book contribute to achieving this goal

Human-Friendly Robotics 2022 Pablo Borja, Cosimo Della Santina, Luka Peternel, Elena Torta, 2023-01-01 This book contains seventeen contributions in the form of independent chapters covering a broad range of topics related to human robot interaction at physical and cognitive levels Each chapter represents a novel piece of work presented during HFR 2022 by researchers in the different areas of robotics where new theories methodologies technologies challenges and empirical and experimental studies are discussed Additionally this compilation is rich in viewpoints due to the multidisciplinary nature of its authors Hence this book represents an excellent opportunity for academics researchers and industry partners to get acquainted with the most recent work on human robot interaction

Software Engineering Trends and Techniques in Intelligent Systems Radek Silhavy, Petr Silhavy, Zdenka Prokopova, Roman Senkerik, Zuzana Kominkova Oplatkova, 2017-04-07 This book presents new approaches and methods to solve real world problems as well as exploratory research describing novel approaches in the field of software engineering and intelligent systems It particularly focuses on modern trends in selected fields of interest introducing new algorithms methods and application of intelligent systems in software engineering The book constitutes the refereed proceedings of the Software Engineering Trends and Techniques in Intelligent Systems Section of the 6th Computer Science On line Conference 2017 CSOC 2017 held in April 2017

Techniques for Virtual Palaeontology, Enhanced Edition Mark Sutton, Imran Rahman, Russell Garwood, 2014-02-05 Virtual palaeontology the use of interactive three dimensional digital models as a supplement or alternative to physical specimens for scientific study and communication is rapidly becoming important to scientists and researchers in the field Using non invasive techniques the method allows the capture of large quantities of useful data without damaging the fossils being studied Techniques for Virtual Palaeontology guides palaeontologists through the decisions involved in designing a virtual palaeontology workflow and gives a comprehensive overview providing discussions of underlying theory applications historical development details of practical methodologies and case studies Techniques covered include physical optical tomography serial sectioning focused ion beam tomography all forms of X ray CT neutron tomography magnetic resonance imaging optical tomography laser scanning and photogrammetry Visualization techniques and data file formats are also discussed in detail Readership All palaeontologists

and students interested in three dimensional visualization and analysis New Analytical Methods in Earth and Environmental Science Because of the plethora of analytical techniques now available and the acceleration of technological advance many earth scientists find it difficult to know where to turn for reliable information on the latest tools at their disposal and may lack the expertise to assess the relative strengths or limitations of a particular technique This new series will address these difficulties by providing accessible introductions to important new techniques lab and field protocols suggestions for data handling and interpretation and useful case studies The series represents an invaluable and trusted source of information for researchers advanced students and applied earth scientists wishing to familiarise themselves with emerging techniques in their field This enhanced e book offers the following features Full colour and high quality graphics Full searchability Internal links to glossaries cross references figures and tables and other pedagogy External links to websites including DOI linking for references and further reading
