Weak States, Vulnerable Governments, and Regional Cooperation Atena Ștefania Feraru, 2021-10-31 War famine poverty organized crime environmental catastrophes refugees epidemics and pandemics modern slavery all these affect people in the non Western world to an increasingly disproportionate extent It is also where wealthy governments wield economic leverage and military force to renegotiate existing norms of international relations Under these circumstances it is difficult to overestimate the importance and urgency of comprehending the mechanisms and motivations driving these phenomena This book is the outcome of a decade long effort to advance both theoretical and empirical understanding of what motivates non Western governments decisions to cooperate not cooperate regionally It starts by acknowledging the Western centrism of prevailing international relations theories abandoning deeply entrenched assumptions regarding the nature and roles of states and redefining state weakness The inquiry continues by elaborating this new concept and applying it to Southeast Asian polities while positing that it creates governments vulnerable to internal and external threats in line with Joel S Migdal's well known findings on the topic A set of regional cooperation strategies is then inferred based on the survival needs of insecure governing elites and its empirical validity is tested against the experience of regional organizations in Africa Asia and the Americas The second part of the book provides an in depth examination of how Southeast Asian governments shared security needs and interests shaped the emergence of the identified regional cooperation pattern and its evolution over 50 years of cooperation within the Association of Southeast Asian Nations ASEAN Overall this book is a call to international relations scholars to do our part in understanding non Western experiences and making a substantive contribution to addressing humanity's most intractable security threats

Quality Peace Peter Wallensteen, 2015-09-08 In *Quality Peace* leading peace researcher Peter Wallensteen offers a broad analysis of peacebuilding isolating what does and not work when settling conflicts The book uses statistical analysis to compare two war outcomes negotiated settlement and victory in the post Cold War era Wallensteen finds that if peace is to last three conditions must be met a losing party must retain its dignity security and the rule of law must be ensured for all and the time horizon for the settlement must be long enough to ensure a sense of normalcy Wallensteen breaks down the components of all of these conditions and applies them to interstate conflicts civil wars in which rebels are aiming to take over the entire state and separatist rebellions He also delves into the issue of world order and the significance of major power relations for local peace efforts Thus the work provides a remarkable understanding of how different types of war outcomes deal with post war conditions Sharply argued and comprehensive *Quality Peace* will invigorate peace research and stimulate peace practice becoming an authoritative work in the field

European Peace and Security Policy Michael Brzoska, 2015-03-26 After the attacks of 9 11 terrorism and other forms of transnational risks of violence dominated official security policy Researchers at the Institute for Peace Research and Security Policy at the University of Hamburg investigated the consequences of this change for security governance in a multi annual research program Case studies show that transnational security policies changed but that national governments remained dominant In other words the transnationalisation of threat perceptions only led to a limited internationalisation of security policies The volume presents results of the research program It combines conceptual work on security governance with empirical research for instance on counterterrorism changing perceptions of security in international organizations such as the European Union and the Organization for Security and Co operation in Europe

French Arms Exports Lucie Béraud-Sudreau, 2020-03-25 From De Gaulle onwards France's strategic independence has been predicated on self sufficiency in modern weapons To

achieve and maintain the requisite defence industrial base in the context of limited domestic orders Paris sought to promote the export of its arms During the Cold War this underpinned but was also an expression of France's determination to resist bipolar domination France offered customers around the world an alternative to reliance on one superpower or the other and in doing so it generated the revenue to support an extensive domestic arms industry The end of the Cold War ushered in fundamental changes however Western defence spending shrank and the global market was turned upside down While France's arms export policy was less affected by human rights concerns than other democracies it was not immune to pressures stemming from the consolidation of Europe's defence industrial base and the increased interest of the EU in regulating the arms trade This Adelphi book considers how France has responded to changing political and market circumstances in the way that it promotes and controls the export of weapons It examines the rationale for considering a liberal arms export policy as essential to French independence and the institutional arrangements that underpinned this It tracks the dramatic changes in the global arms market since 1990 in terms of demand and market competition and charts the response of the French government to these changes The book underlines how the French machinery of government as a directing force behind the defence industry has been resistant to the notion of export restraint even in the case of sales to authoritarian regimes However it argues that France now faces a dilemma over whether to continue with a long successful course or to moderate its independence through greater collaboration to bolster European integration and better compete globally

Propaganda 2.1 Peter K. Fallon, 2022-09-08 Since the US presidential election of 2016 the words propaganda and fake news have been prominent in American political and cultural discourse Yet very few people can provide a coherent explanation of what they mean precisely when using them On the two sides of the political spectrum red and blue each points out messages from the other side that they think are untrue or that they simply don't like Unlike our dangerously biased political system however reality has more than only two sides For decades Americans sat by while their mediated world was carved into a single red reality focused in necessary opposition to a single blue reality We've been given red media outlets and blue media outlets to stoke our collective rage each against the other's lies But the first two decades of the twenty-first century have presented us with a new information environment one of unregulated and seemingly uncontrollable information Like the young boy in a popular folktale we can now see if only we can resist the pressures of social conformity that both emperors red and blue strut proudly before us naked Propaganda 2.1 is a handbook for seeing reality clearly and coping with it
