Here for Good: Community Foundations and the Challenges of the 21st Century Terry Mazany, David C.

Perry, 2014-12-18 Community foundations bring together the resources of individuals, families and businesses to support effective nonprofits in their communities. Over the years, foundations have come to engage community problem solving through more than just grant making. They have added a rich array of other activities including programs of community capacity building, active modes of advocacy and centres for meeting. In 2011, the 700 institutions in the United States gave an estimated 4.2 billion to a variety of nonprofit activities in fields that included the arts and education, health and human services, the environment and disaster relief. The origins of this book stem from conversations among the leadership of community foundations about the challenges they must overcome in order to make such foundational contributions to their communities. As community foundations enter the second century of their existence, the first foundation was formed in Cleveland in 1914, the need for knowledge and best practices has never been greater. This book, with expert authors representing the best and the brightest in this important field, fills that need. **Caring Capitalism** Emily

Barman, 2016-04-08 The book analyzes the changing meaning and measure of social value in an era of caring capitalism.

Philanthropy for Health in China Jennifer Ryan, Lincoln C. Chen, Anthony J. Saich, 2014-05-05 Drawing on the expertise of Chinese and Western academics and practitioners, the contributors to this volume aim to advance the understanding of philanthropy for health in China in the 20th century and to identify future challenges and opportunities. Considering government, NGO leaders, domestic philanthropists and foreign foundations, the volume examines the historical roots and distinct stages of philanthropy and charity in China, the health challenges philanthropy must address and the role of the Chinese government, including its support for Government Organized Non Governmental Organizations (GONGOs). The editors discuss strategies and practices of international philanthropy for health, the role of philanthropy in China's evolving health system and the prospects for philanthropy in a country beginning to engage with civil society. New Frontiers of

Philanthropy Lester M. Salamon, 2014-06-13 The resources of both governments and traditional philanthropy are either barely growing or in decline, yet the problems of poverty, ill health and environmental degradation balloon daily. It is therefore increasingly clear that we urgently need new models for financing and promoting social and environmental objectives. Fortunately, a significant revolution appears to be underway on the frontiers of philanthropy and social investing, tapping not only philanthropy but also private investment capital and providing at least a partial response to this dilemma. This book examines the new actors and new tools that form the heart of this revolution and shows how they are reshaping the way we go about supporting solutions to social and environmental problems throughout the world. With contributions from leading experts in the field, New Frontiers of Philanthropy provides a comprehensive analysis of the many new institutions that have surfaced on this new frontier of philanthropy and social investment, the new tools and instruments these institutions are

bringing to bear the challenges that these actors and tools still encounter and the steps that are needed to maximize their impact The result is a powerful and accessible guide to developments that are already bringing significant new resources into efforts to solve the world s problems of poverty ill health and environmental degradation unleashing new energies and new sources of ingenuity for social and environmental problem solving and generating new hope in an otherwise dismal scenario of lagging resources and resolve Investors philanthropists social entrepreneurs nonprofit leaders business executives government officials and students the world over will find much to build on in these pages

Interrogating Neoliberalism and Cruel Optimism in Education Louise Azzarello,2025-03-31 This book is a philosophical examination of the ways in which neoliberalism underpins and impedes public education It proposes that education s adoption of neoliberal logic generates a sense of despair amongst educators who often enter the profession with the hope of building a better more just world Drawing on the author s 27 years of experience as a secondary classroom teacher and engaging with a range of theoretical concepts cultural objects and scenes of violence from her time in the classroom *The Radical Potency of Despair* renders visible the ongoing harms that neoliberal logic creates for education and educators The author proposes a new ruptured fantasy of education and suggests that it is not hope that ignites educators who keep fighting for education but rather despair Despair is conceived of as a generative force provoking educators to hold time and space open for pedagogical encounters that interrupt the ongoing instrumentalization of education The author further conceptualizes a notion of thinking with images as a pedagogical interruptive force Thinking with images she argues gives students time and space to attend to what they see thus affording them the chance to think differently about the violence of modern society Such pedagogical interruptions are presented as a refusal of the normative order of education countering present infrastructures that aim to constrain and instrumentalize education A compelling and original volume it will appeal to scholars researchers and upper level students with interests in neoliberalism and education the philosophy of education critical pedagogy and educational policy and politics
