Facilities Management and Corporate Real Estate Management as Value Drivers Per Anker Jensen, Theo van der Voordt, 2016-10-04 Facilities Management FM and Corporate Real Estate Management CREM are two closely related and relatively new management disciplines with developing international professions and increasing academic attention Both disciplines have from the outset a strong focus on controlling and reducing cost for real estate facilities and related services In recent years there has been a change towards putting more focus on how FM CREM can add value to the organisation This book is driven by the need to develop a widely accepted and easily applicable conceptual framework of adding value by FM and CREM It presents the state of the art of theoretical knowledge and empirical evidence about the impact of buildings and facilities on 12 value parameters and how to manage and measure these values The findings are

connected to a new Value Adding Management model The book is research based with a focus on guidance to practice It offers a transdisciplinary approach integrating academic knowledge from a variety of different fields with practical experience It also includes 12 interviews with practitioners shedding light as to how they manage adding value in practice This is a much needed resource for practitioners researchers and teachers from the field of FM and CREM as well as students at both undergraduate and postgraduate level A Handbook of Management Theories and Models for Office Environments and Services Rianne Appel-Meulenbroek,Vitalija Danivska,2021-08-02 Although workplace design and management are gaining more and more attention from modern organizations workplace research is still very fragmented and spread across multiple disciplines in academia There are several books on the market related to workplaces facility management FM and corporate real estate management CREM disciplines but few open up a theoretical and practical discussion across multiple theories from different disciplines Therefore workplace researchers are not aware of all the angles from which workplace management and effects of workplace design on employees has been or could be studied A lot of knowledge is lost between disciplines and sadly many insights do not reach workplace managers in practice Therefore this new book series is started by associate professor Rianne Appel Meulenbroek Eindhoven University of Technology the Netherlands and postdoc researcher Vitalija Danivska Aalto University Finland as editors published by Routledge It is titled Transdisciplinary Workplace Research and Management because it bundles important research insights from different disciplinary fields and shows its relevance for both academic workplace research and workplace management in practice The books will address the complexity of the transdisciplinary angle necessary to solve ongoing workplace related issues in practice such as knowledge worker productivity office use and more strategic management In addition the editors work towards further collaboration and integration of the necessary disciplines for further development of the workplace field in research and in practice This book series is relevant for workplace experts both in academia and industry This second book in the series focuses on the role of workplace management in the organization and the tasks that workplace management needs to consider The 18 theories that are presented in this book and applied to workplace research discuss management aspects from the organization s perspective or dive deeper into issues related to people and or building management They all emphasize that workplace management is a complex matter that requires more strategic attention in order to add value for various stakeholders The final chapter of the book describes a first step towards integrating the presented theories into an interdisciplinary framework for developing a grand workplace management theory **Harnessing AI in Geospatial Technology for Environmental Monitoring and Management** Mobo, Froilan D.,2024-12-06 The integration of Artificial Intelligence AI with geospatial technologies is increasingly vital in addressing environmental challenges facing society today As climate change resource depletion and environmental degradation intensify AI driven geospatial tools offer powerful solutions for monitoring ecosystems predicting environmental changes and managing natural resources more effectively By

harnessing AI to analyze large volumes of environmental data decision makers can gain deeper insights and make more informed timely decisions to protect the environment This convergence of technology and environmental science has the potential to revolutionize how we understand and respond to environmental issues making it a critical area of focus for sustainable development and environmental protection efforts **Harnessing AI in Geospatial Technology for Environmental Monitoring and Management** explores the integration of AI with geospatial technologies to advance environmental monitoring and management practices It discusses methods challenges and emerging technologies in the field Covering topics such as agriculture environmental information and solar energy this book is an excellent resource for academicians researchers professionals policymakers government officials graduate and postgraduate students and more **Technology, Design and Process Innovation in the Built Environment** Peter Newton, Keith Hampson, Robin Drogemuller, 2009-02-09 Buildings and infrastructure represent principal assets of any national economy as well as prime sources of environmental degradation Making them more sustainable represents a key challenge for the construction planning and design industries and governments at all levels and the rapid urbanisation of the 21st century has turned this into a global challenge This book embodies the results of a major research programme by members of the Australia Co operative Research Centre for Construction Innovation and its global partners presented for an international audience of construction researchers senior professionals and advanced students It covers four themes applied to regeneration as well as to new build and within the overall theme of Innovation Sustainable Materials and Manufactures focusing on building material products their manufacture and assembly and the reduction of their ecological fingerprints the extension of their service lives and their re use and recyclability It also explores the prospects for applying the principles of the assembly line Virtual Design Construction and Management viewed as increasing sustainable development through automation enhanced collaboration such as virtual design teams real time BL performance assessment during design simulation of the construction process life cycle management of project information zero information loss risk minimisation and increased potential for innovation and value adding Integrating Design Construction and Facility Management over the Project Life Cycle by converging ICT design science engineering and sustainability science Integration across spatial scales enabling building infrastructure synergies such as water and energy efficiency Convergences between IT and design and operational processes are also viewed as a key platform increased sustainability *Australian Master OHS and Environment Guide* ,2007 The first point of reference for all OHS and environmental best practice and strategy providing operational guidance with examples to achieve optimal workplace safety and environmental sustainability **Mixed Methods Research Design for the Built Environment** Julius Akotia, Bankole Osita Awuzie, Charles Egbu, 2023-12-08 The application of mixed methods research design in the built environment discipline by students and academics has continued to grow exponentially However with no dedicated mixed methods research design textbook in this domain students have struggled to conduct research projects involving a mixed

methods research design Mixed Methods Research Design for the Built Environment provides a useful research methodology resource for students academics and researchers across various disciplines in the built environment such as construction management and project management property and real estate management quantity surveying and commercial management building surveying building services engineering civil and geodetic engineering and other built environment disciplines The book can also be useful for students and academics outside the built environment knowledge domain This textbook offers practical and step by step guidance on how to apply mixed methods research design including an elucidation of the various philosophical and methodological underpinnings upon which the choice of a particular variant of the mixed methods research design is predicated It provides practical case examples and guidance on the processes involved to design and undertake mixed methods research the advantages and disadvantages of using mixed methods research and how multiple sources of qualitative and quantitative data can be combined and applied to carry out research projects
