Africa Unity Sovereignty And Sorrow:

Africa Pierre Englebert, 2009 Explores the endurance of Africa's weak states which despite their failure to protect and promote the interests of their citizens translate international sovereignty into domestic legal command **Africa**, 2009

Africa Pierre Englebert, 2022 Though the demise of one or another African state has been heralded for nearly five decades the map of the continent remains virtually unchanged By and large these states have failed to protect and promote the interests of their citizens yet they endure Asking why Pierre Englebert carefully articulates the manner in which international sovereignty is translated into domestic legal command and the sorrow that ensues *The African Renaissance and the Afro-Arab Spring* Charles Villa-Vicencio, Erik Doxtader, Ebrahim Moosa, 2015-03-16 The hope and despair surrounding the Afro Arab Spring in North Africa has only begun to be played out in regional and global politics And the call for an African renaissance that followed the miraculous political transition in South Africa is twenty years later viewed with similar ambiguity What is clear is that current developments in Africa north and south promise something markedly different from what has prevailed at any point since the dawn of the African independence movements of the 1950s and 60s But the continent's own identity remains unresolved posing the question whether and how its multiple and divergent experiences can be understood and perhaps woven into a basis for unity Contributors to this volume explore whether or not events north of the Sahara and on the southern tip of Africa can be catalysts for change in other parts of the continent Chapters assesses the nature of political resistance revolution and transition in North and Southern Africa addressing critical factors economics culture gender theology that reveal the promises and perils of African reform Includes a foreword by former South African president Thabo Mbeki *The End of Western Hegemonies?* Marie-Josée Lavallée, 2022 In the face of recent trends like growing authoritarianism and xenophobic nationalism the rise of the Far Right the explosion of economic and social inequalities heightened geopolitical contest and global capitalism's endless crisis and the impacts of shocks like the Covid 19 pandemic discourses about the decline of the West no more look like mere ruminations of a handful of cultural depressives and politically disillusioned they sound increasingly realistic This volume addresses this issue by mapping and analyzing the forms mechanisms strategies and effects in the past the present and the future of Western hegemonies namely asymmetrical relations that bring advantages or at least secure the superiority of Western state and non state actors in politics economics and culture broadly understood Over the past decades and centuries Westerners never ceased claiming supremacy in all these spheres A host of these relations were initiated through colonialism and imperialism and perpetuated through informal imperialism but there are other channels political interference inequalities between countries and attempts at affirming the supremacy of the so called Western way of life was also secured through the military might and economic power of great Western actors This book explores sites of Western hegemonies and contributes to understanding the mechanisms through which international hierarchies are formed and maintained Bringing together the research of scholars from various fields in

the humanities and social sciences political science international relations political philosophy sociology history postcolonial studies criminology and linguistics this volume develops a multidisciplinary outlook on the issue of Western hegemonies that allows uncovering resemblances between various forms of asymmetrical relations and their mechanisms **Survival 60.2** Erik Jones, 2023-04-28 *Survival* the bi monthly publication from The International Institute for Strategic Studies is a leading forum for analysis and debate of international and strategic affairs With a diverse range of authors thoughtful reviews and review essays *Survival* is scholarly in depth while vivid well written and policy relevant in approach Shaped by its editors to be both timely and forward thinking the publication encourages writers to challenge conventional wisdom and bring fresh often controversial perspectives to bear on the strategic issues of the moment *African States* Abu Bakarr Bah, 2025-03-01 Essays on the security challenges faced by African states The central concern that shapes this edited volume is the nature of the African state Contributors point to an interesting intersection of domestic and external issues that is framed as a glocalised security situation Individual chapters shed new insights on conflict drivers through case studies on Sierra Leone Cameroon Mali Nigeria and Somalia as well as broader issues on the nature of African states Arguments pivot on three issues which show the intersection of the domestic and external forces that render the African state as a glocal problem a the colonial roots of the state b problems of governance and c international and regional security imperatives By problematizing the African state and connecting the security challenges of African states to colonialism patrimonial rule and geopolitical security issues *African States* brings forth a new way of examining African states through the notion of glocalised security

The Politics of Deforestation in Africa Nadia Rabesahala Horning, 2018-04-24 This book explores how environmental policies are made and enforced in Africa Specifically this project explains the gap between intent and impact of forest policies focusing on three African societies facing persistent deforestation today Madagascar Tanzania and Uganda The central claim of the study is that deforestation persists because conservation policies and projects which are largely underwritten by foreign donors consistently ignore the fact that conservation is possible only under limited and specific conditions To make the case the author examines how decision making power is negotiated and exercised where communities make environmental decisions daily local level and where environmental policies are negotiated and enacted national level across three distinct African political systems **War and Conflict in Africa** Paul D. Williams, 2013-04-26 After the Cold War Africa earned the dubious distinction of being the world's most bloody continent But how can we explain this proliferation of armed conflicts What caused them and what were their main characteristics And what did the world's governments do to stop them In this fully revised and updated second edition of his popular text Paul Williams offers an in depth and wide ranging assessment of more than six hundred armed conflicts which took place in Africa from 1990 to the present day from the continental catastrophe in the Great Lakes region to the sprawling conflicts across the Sahel and the web of wars in the Horn of Africa Taking a broad comparative approach to examine the political contexts in which these wars

occurred he explores the major patterns of organized violence the key ingredients that provoked them and the major international responses undertaken to deliver lasting peace Part I Contexts provides an overview of the most important attempts to measure the number scale and location of Africa s armed conflicts and provides a conceptual and political sketch of the terrain of struggle upon which these wars were waged Part II Ingredients analyses the role of five widely debated features of Africa s wars the dynamics of neopatrimonial systems of governance the construction and manipulation of ethnic identities questions of sovereignty and self determination as well as the impact of natural resources and religion Part III Responses discusses four major international reactions to Africa s wars attempts to build a new institutional architecture to help promote peace and security on the continent this architecture s two main policy instruments peacemaking initiatives and peace operations and efforts to develop the continent War and Conflict in Africa will be essential reading for all students of international peace and security studies as well as Africa s international relations

Imagining the United States of Africa E. Ike Udogu, 2015-02-10 This book frames the debates around the pressing desire for some form of unification that found expression in the pan Africanist movement and formation of the Organization of African Unity in Addis Ababa Ethiopia in 1963 following the advent of home rule for many former colonies of the Western powers Discussions in this volume address the following fundamental issues nationalism and political integration and how the contradictions between both philosophies can be resolved the amelioration of corruption in order to attract internal and external investments critical for developing the vast natural resources housed in the continent the need for Africa s adaptation to the ideology and practice of capitalism and liberal globalization to suit the character of African states in a projected federal United States of Africa solutions to ethnic conflicts that are bound to happen over clashes of competing group interests the indispensability and promotion of information communication technologies and urgent need to strengthen a network of regional electric power grids that would provide constant energy to the Union and lead to improvement in communication and economic growth and recommendation of social democracy as the genre of democracy suitable for a proposed United States of Africa
