Africa's ICT Infrastructure Vivien Foster,Cecilia Briceño-Garmendia,2011-06-23 Africa s ICT Infrastructure reviews how the investment in the sector has been financed and how the structure of the market has changed since the liberalization process started It looks at the role of both private and public institutions as sources of financing for the sector and charts the emergence of investors from developing countries in leading the expansion of the sector across the region *Accelerating Poverty Reduction in Africa* Kathleen Beegle,Luc Christiaensen,2019-03-01 Sub Saharan Africa s turnaround over the past couple of decades has been dramatic After many years in decline the continent s economy picked up in the mid 1990s Along with this macroeconomic growth people became healthier many more youngsters attended schools and the rate of extreme poverty declined from 54 percent in 1990 to 41 percent in 2015 Political and social freedoms expanded and gender equality advanced Conflict in the region also subsided although it still claims thousands of civilian lives in some countries and still drives pressing numbers of displaced persons Despite Africa s widespread economic and social welfare accomplishments the region s challenges remain daunting Economic growth has slowed in recent years Poverty rates in many countries are the highest in the world And notably the number of poor in Africa is rising because of population growth From a global perspective the biggest concentration of poverty has shifted from South Asia to Africa *Accelerating Poverty Reduction in Africa* explores critical policy entry points to address the demographic societal and political drivers of poverty improve income earning opportunities both on and off the farm and better mobilize resources for the poor It looks beyond macroeconomic stability and growth critical yet insufficient components of these objectives to ask what more could be done and where policy makers should focus their attention to speed up poverty reduction The pro poor policy agenda advanced in this volume requires not only economic growth where the poor work and live but also mitigation of the many risks to which African households are exposed As such this report takes a jobs lens to its task It focuses squarely on the productivity and livelihoods of the poor and vulnerable that is what it will take to increase their earnings Finally it presents a road map for financing the poverty and development agenda [Routledge Handbook of Counterterrorism and Counterinsurgency in Africa](#) Usman A. Globalization and Cyberculture Kehbuma Langmia,2016-12-20 This book argues for hybridity of Western and African cultures within cybercultural and subcultural forms of communication Kehbuma Langmia argues that when both Western and African cultures merge together through new forms of digital communication marginalized populations in Africa are able to embrace communication which could help in the socio cultural and political development of the continent On the other hand the book also engages Richard McPhail s Electronic Colonization Theory in order to demonstrate how developing areas such as Africa experience a new form of imperialistic subjugation because of electronic and digital communication Globalization and Cyberculture illustrates how new forms of communication inculcate age old traditional forms of communications into Africa s cyberculture while complicating notions of identity dependency and the digital divide gap

Socioeconomic Shocks and Africa's Development Agenda Evans Osabuohien, Gbadebo Odularu, Daniel

Ufua, Romanus Osabohien, 2022-11-10 This book investigates how African countries respond to socioeconomic shocks drawing out lessons to help to inform future policy and development efforts. The challenges posed by the COVID-19 pandemic affected all sectors of the economy exposing substantial structural weaknesses and complexities in supply chains and logistics across the African continent. This book examines the disruptive impact of the pandemic across Africa. However, it also goes beyond the current crisis to investigate how socioeconomic pressures in general impact commodity prices, national budgeting processes, food, business, energy, sectors, education, health, and sanitation. Overall, the book presents evidence-based solutions and policy recommendations to enable readers to improve resilience and responses to future crises. The insights provided by this book will be of interest to policymakers and development agencies as well as to researchers of global development, politics, economics, business, and African studies.

Innovation for Sustainable Development Jean-Yves Grosclaude, Rajendra K. Pachauri, Laurence Tubiana, 2014-02-20 Innovation has become the new buzzword across the globe. International organisations, governments, corporates, academia, and society see it as the answer to the major economic, social, and environmental transformations challenging the models of the 20th century. Innovations are occurring worldwide and alternative solutions to the existing problems are emerging in all sectors: electric cars, organic farming, renewable energy, and e-learning are good examples. These alternatives can be ascribed with qualities such as decentralized, frugal, flexible, smart, and democratic virtues that are lacking in conventional models. They are attributed with the potential to meet the overall global challenges such as climate change and the growing inequalities between and within countries. What is the real potential of innovation? Does the rapid deployment of innovations lead towards a more sustainable and inclusive society? Can innovations and the emerging alternatives replace conventional models? Beyond technologies, what institutional innovations are required to support sustainable development? A Planet for Life 2014 aims to answer these questions and explore innovation in all its aspects through a series of texts written by international experts. The objective of this book is to analyse experiences from across the world and the role of innovation in a variety of areas of development such as urbanization, agriculture, and food, the mobility of people and freight, education, and the provision of water and energy to all.
