Archaeological Chemistry Rsc Rsc Paperbacks:

Archaeological Chemistry A Mark Pollard, Carl Heron, 2007-10-31 The application of chemistry within archaeology is an important and fascinating area. It allows the archaeologist to answer such questions as what is this artefact made of, where did it come from and how has it been changed through burial in the ground, providing pointers to the earliest history of mankind. *Archaeological Chemistry* begins with a brief description of the goals and history of archaeological science and the place of chemistry within it. It sets out the most widely used analytical techniques in archaeology and compares them in the light of relevant applications. The book includes an analysis of several specific archaeological investigations in which chemistry has been employed in tracing the origins of or in preserving artefacts. The choice of these investigations conforms to themes based on analytical techniques and includes chapters on obsidian, ceramics, glass, metals and resins. Finally, it suggests a future role for chemical and biochemical applications in archaeology. *Archaeological Chemistry* enables scientists to tackle the fundamental issues of chemical change in the archaeological materials in order to advance the study of the past. It will prove an essential companion to students in archaeological science and chemistry, field and museum archaeologists and all those involved in conserving human artefacts.

Archaeological Chemistry A Mark Pollard, Carl Heron, Ruth Ann Armitage, 2020-08-28 The use of chemistry in archaeology can help archaeologists answer questions about the nature and origin of the many organic and inorganic finds recovered through excavation, providing valuable information about the social history of humankind. This textbook tackles the fundamental issues in chemical studies of archaeological materials. Examining the most widely used analytical techniques in archaeology, the third edition of this comprehensive textbook features a new chapter on proteomics, capturing significant developments in protein recognition for dating and characterisation. The textbook has been updated to encompass the latest

developments in the field The textbook explores several archaeological investigations in which chemistry has been employed in tracing the origins of or in studying artefacts and includes chapters on obsidian ceramics glass metals and resins It is an essential companion to students in archaeological science and chemistry as well as to archaeologists and those involved in conserving human artefacts

Conservation Science for the Cultural Heritage Evangelia A. Varela, 2012-12-15 Conservation Science is a rather innovative application of instrumental analysis with steadily increasing importance Although the first attempts for preserving material from the cultural heritage on a scientific basis are found in the 19th century pioneer chemistry years only the use of sophisticated physicochemical techniques results in effective identification and deterioration studies of monuments and objects and in reliable intervention procedures This volume allows to gain solid knowledge and improved skills on the ways separation schemes and diagnostic methodologies are applied in the safeguarding and authentication of tangible works of art as well as on the modes of implementing novel safeguarding practices built on well established principles such as the use of laser in the decontamination of objects All techniques are covered at a state of the art level while selected applications permit addressing major groups of materials and artefacts Conservation Science is nowadays taught at master s level in all developed countries and museum laboratories increasingly adopt scientific approaches in their restoration initiatives The book is intended as a valuable tool for students and professionals active in these frames In addition it provides an indispensable manual for participants in the specialized intensive courses which are systematically offered by the authors under the auspices of the relevant European network

Chemistry of Paper J C Roberts, 2007-10-31 The manufacture of paper involves a large amount of chemistry including carbohydrate chemistry pigments and resins and colloid and surface chemistry as well as elements of environmental and analytical chemistry Providing an overview of the making of paper from a chemical perspective this book deals with both the chemistry of paper as a material and the chemistry of its production The

book explores several chemical processes involved in the production of paper the delignification of the wood fibres performed at elevated temperature and pressure the bleaching of the cellulose rich pulp using environmentally friendly systems the formation of the pulp into sheets of fibres strengthened by extensive inter fibre hydrogen bonding and finally the coating of the sheets in a manner appropriate to their end use This book is an informative and entertaining overview for students and others who require an introduction to the chemistry of paper manufacture Chemistry of Polymers John W

Nicholson,2007-10-31 The Chemistry of Polymers is a concise easy to read inexpensive introduction to the subject and fulfils the need for a polymer text written from an applied angle It covers the basics of polymer chemistry while emphasising the practical applications and is essential for those who wish to acquire a rapid overview of the field This book covers the basics of polymer synthesis characterisation reaction kinetics and materials science as well as important specialised topics such as polymer degradation polymers and pollution and a variety of technological developments Now in its second edition the book has been revised and expanded to reflect recent developments in the subject There are for example extensive updates to the Special topics in polymer chemistry section with an additional section on optically active polymers expanded sections on ionic and co ordination polymerisations and copolymerisation and additional examples of new environmental legislation are outlined wherever appropriate ARCHAEOLOGY - Volume I Donald L.
