predominantly been analyzed via the former Yugoslav context and the Balkans however spotlight has also been directed to the current political climate of the UK Australia and the Anglo Saxon geopolitics The analysis helps in understanding broader emergent patterns of sociospatial polarization across various scales and in respect to global geoeconomic and geopolitical restructuring This is particularly important because drawing connections between balkanization economics law media and technology is to gain an awareness of and engagement with the emerging implications of spatial remaking and global politics This monograph is a valuable resource and will be relevant to academics and students interested in spatial politics including architecture urbanism geography sociology politics international development conflict and cultural studies [Event-Cities 5](#) Bernard Tschumi,2024-11-12 An essential resource on the work of Bernard Tschumi Architects with a focus on how concept context and program intersect with intuition in singular and unexpected ways Event Cities 5 is the fifth and final volume in the MIT Press series documenting recent built and unbuilt projects by renowned architect Bernard Tschumi This volume expands on the theoretical preoccupations that have shaped Tschumi s work in practice and pedagogy In this volume Tschumi embarks on what he calls a poetics that addresses both the rational elaboration of work and the irrational eruption of inexplicable elements in architectural projects How do chance intuition and analogy among other elements intersect with the logical play of concept context and program to generate innovative and informed design Highlights of this volume include circular building projects works with suspended gardens and floating rectangular masses superposed structures created via surrealist tactics an immense educational research complex in France that hovers between building and urban design a museum in China made from intersecting conic shapes and a project for a cultural center in Italy that is structured as an investigation into courtyards and facades The book features nearly 30 projects developed over the last fifteen years and highlights Tschumi s longstanding interest not only in producing conceptual clarity but in questioning architecture itself

Bare Architecture Chris L. Smith, 2017-10-19 Bare Architecture a schizoanalysis is a poststructural exploration of the interface between architecture and the body Chris L Smith skilfully introduces and explains numerous concepts drawn from poststructural philosophy to explore the manner by which the architecture body relation may be rethought in the 21st century Multiple well known figures in the discourses of poststructuralism are invoked Gilles Deleuze and Félix Guattari Roland Barthes Georges Bataille Maurice Blanchot Jorge Luis Borges and Michel Serres These figures bring into view the philosophical frame in which the body is formulated Alongside the philosophy the architecture that Smith comes to refer to as bare architecture is explored Smith considers architecture as a complex construction and the book draws upon literature art and music to provide a critique of the limits extents and opportunities for architecture itself The book considers key works from the architects Douglas Darden Georges Pingusson Lacatan and Vassal Carlo Scarpa Peter Zumthor Marco Casagrande and Sami Rintala and Raumlabor Such works are engaged for their capacities to foster a rethinking of the relation between architecture and the body

Global Perspectives on Critical Architecture Gevork Hartoonian, 2016-03-03 Judging from the debates taking place in both education and practice it appears that architecture is deeply in crisis New design and production techniques together with the globalization of capital and even skilled labour have reduced architecture to a commodified object its aesthetic qualities tapping into the current pervasive desire for the spectacular These developments have changed the architect's role in the design and production processes of architecture Moreover critical architectural theories including those of Breton Heidegger and Benjamin which explored the concepts of technology modernism labour and capital and how technology informed the cultural along with later theories from the 1960s which focused more on the architect's theorization of his/her own design strategies seem increasingly irrelevant In an age of digital reproduction and commodification these theoretical approaches need to be reassessed Bringing together essays and interviews from leading scholars such as Kenneth Frampton Peggy Deamer Bernard Tschumi Donald Kunze and Marco Biraghi this volume investigates and critically addresses various dimensions of the present crisis of architecture It poses questions such as Is architecture a conservative cultural product servicing a given producer consumer system Should architecture's affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm Is architecture's infusion into the cultural the reason for the visibility of architecture today What room does the city leave for architecture beyond the present delirium of spectacle Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism Or alternatively putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts
