The House of Light and Entropy Alessandra Ponte, 2014 Formerly announced as Maps and Territories this collection of essays written by landscape historian Alessandra Ponte begins with an investigation of the American obsession with lawns and then continues to collectively map the aesthetic scientific and technological production of past and present North American landscapes These include the American desert as a privileged site of scientific and artistic testing the faraway projects of electrification of the Canadian North the transformation of the notion and perception of waste and wasteland during the twentieth century the photographic medium and its encounters with Native Americans as well as an introductory essay The Map and the Territory written specifically for this volume **Design and the Built Environment of the Arctic**

Leena Cho, Matthew Jull, 2023-12-20 Design and the Built Environment of the Arctic is a concise introductory guide to the design and planning of the built environments in the Arctic region As the global forces of change are becoming more pronounced in the Arctic the future trajectories for living environments city making processes and their adaptive capacities need to be addressed directly This book presents 11 new and original contributions from both leading and emerging scholars and practitioners positioning the Arctic as a dynamic diverse and lived place at the nexus of unprecedented socioenvironmental transformations The volume offers key concepts for understanding and spatializing Arctic cities and landscapes similarities and differences in the development of design and planning approaches responsive to specific climatic and cultural conditions and historical and geographic case studies that provide unique perspectives for the management of the built environment from the scales of a building and infrastructure to cities and territories Altogether the contributions expand regional Arctic design scholarship to understand how the variability of the Arctic context influences the designed urban architecture and landscape systems and offer numerous lessons for design and other forms of spatial practice both within and beyond the Arctic This is a unique resource for researchers creative practitioners policymakers and community decision makers as well as for advanced undergraduate and graduate students *Play Among Books* Miro Roman, Alice

_ch3n81, 2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science *Modernism and the Mediterranean* JanK. Birksted, 2017-07-05 Situated in a Mediterranean landscape the Maeght Foundation is a unique Modernist museum product of an extraordinary collaboration between the architect Jos uis Sert and the artists whose work was to be displayed there The architecture garden design and art offer a rare opportunity to see work in settings conceived in active collaboration with the artists themselves By focusing

on the relationship between this art foundation and its Arcadian setting including Joan Miró's labyrinth, George Braque's pool, Tal Coat's mosaic wall and Giacometti's terrace. Jan K Birksted demonstrates how the building articulates many of the ideas that preoccupied this group of artists during the culminating years of their lives. The study pays special attention to the ways in which architecture can shape the experience of time and addresses the Modernist desire for wilderness and its problematic roots in the classical Mediterranean ideal. In showing how the design of the Maeght Foundation is a Modernist representation of Mediterranean culture, the author has developed an interpretation of architecture that accommodates not only the architect's handling of material or function but shows as well how it can be the embodiment of a particular vision of space and time.

The New Monuments and the End of Man Robert Slifkin, 2019-11-05 How leading American artists reflected on the fate of humanity in the nuclear era through monumental sculpture. In the wake of the atomic bombings of Japan in 1945, artists in the United States began to question what it meant to create a work of art in a world where humanity could be rendered extinct by its own hand. *The New Monuments and the End of Man* examines how some of the most important artists of postwar America revived the neglected tradition of the sculptural monument as a way to grapple with the cultural and existential anxieties surrounding the threat of nuclear annihilation. Robert Slifkin looks at such iconic works as the industrially evocative welded steel sculptures of David Smith, the austere structures of Donald Judd, and the desolate yet picturesque earthworks of Robert Smithson. Transforming how we understand this crucial moment in American art, he traces the intersections of postwar sculptural practice with cybernetic theory, science fiction, cinema, and literature, and the political debates surrounding nuclear warfare. Slifkin identifies previously unrecognized affinities of the sculpture of the 1940s and 1950s with the minimalism and land art of the 1960s and 1970s, and acknowledges the important contributions of postwar artists who have been marginalized until now, such as Raoul Hague, Peter Grippe, and Robert Mallary. Strikingly illustrated throughout, *The New Monuments and the End of Man* spans the decades from Hiroshima to the Fall of Saigon, when the atomic bomb cast its shadow over American art.

Abstract, 2000 **Western Electrician**, 1906 *Bulletin of the Atomic Scientists*, 1972-10 The *Bulletin of the Atomic Scientists* is the premier public resource on scientific and technological developments that impact global security. Founded by Manhattan Project Scientists, the *Bulletin*'s iconic Doomsday Clock stimulates solutions for a safer world.
