Managing Data Using Excel Mark Gardener, 2015-04-20 Microsoft Excel is a powerful tool that can transform the way you use data. This book explains in comprehensive and user friendly detail how to manage, make sense of, explore and share data, giving scientists at all levels the skills they need to maximize the usefulness of their data. Readers will learn how to use Excel to build a dataset, how to handle variables and notes, rearrangements and edits to data, check datasets dealing with typographic errors, data validation and numerical errors, make sense of data including datasets for regression and correlation, summarizing data with averages and variability and visualizing data with graphs, pivot charts and sparklines. Explore regression data, finding, highlighting and visualizing correlations. Explore time related data using pivot tables, sparklines and line plots. Explore association data, creating and visualizing contingency tables. Explore differences, pivot tables and data visualizations including box whisker plots. Share data methods for exporting and sharing your datasets, summaries and graphs. Alongside the text, Have a Go exercises, Tips and Notes give readers practical experience and highlight important points and helpful self assessment exercises and summary tables can be found at the end of each chapter. Supplementary material can also be downloaded on the companion website. **Managing Data Using Excel** is an essential book for all scientists and students who use data and are seeking to manage data more effectively. It is aimed at scientists at all levels but it is especially useful for university level research from undergraduates to postdoctoral researchers.

The Executive Function Guidebook

Roberta Strosnider, Valerie Saxton Sharpe, 2019-03-22 Teach some of the most important skills your students will ever need. Please try harder. Please pay attention. Please behave. Most students want to do what it takes to succeed but sometimes that's easier said than done. Executive function skills such as self regulation, focus, planning and time management must be taught and they take practice. When you work on them in class you give students the tools they need to not only learn but also monitor themselves. Teaching executive function skills in your classroom doesn't have to be difficult. This unique guidebook designed with busy teachers in mind introduces a flexible seven step model that incorporates Universal Design for Learning (UDL) principles and the use of metacognition. Features include: Descriptions of each skill and its impact on learning. Examples of instructional steps to assist students as they set goals and work to achieve success. Strategies coded by competency and age/grade level. Authentic snapshots and think about sections. Templates for personalized goal setting, data collection and success plans. Accompanying strategy cards. Whether you teach kindergarten, high school or anything in between you can make executive function training part of your teaching. As students' proficiencies improve you will see their confidence and capability increase, setting the stage for their success in school and in life.
