Digital Games After Climate Change Benjamin J. Abraham, 2022-03-07 This book presents the first sustained analysis of the digital game industry's carbon footprint and its role in exacerbating global climate change. Identifying the ways videogames can actually help combat the climate crisis, it argues for the urgency of transitioning to a fully carbon neutral games industry, exploring the challenges and opportunities inherent in this undertaking. Beginning with an analysis of debates around the persuasive power of games, the book argues that real impact can only be achieved by focusing on the material conditions of game production, by reducing greenhouse gas emissions from making, selling, and playing games, as well as the hardware used to play them. Abraham makes a compelling argument that a sustainable games industry is possible and outlines the actions that everyone can take to reduce the harms that digital games cause to people and planet.

Media Management Bernd W. Wirtz, 2020-09-11 Digitalization significantly changes the media. To cope with this change and to exploit new market opportunities is a major challenge for media corporations. Bernd Wirtz provides a valuable guideline for this new world, combining theory, facts, and practice. Dr. Hubert Burda, German publisher and Managing Corporate Partner of Hubert Burda Media Holding KG, states: "The media business is subject to substantial change while differences between distinctive media areas are fading away. This is due to technical innovation in areas like transmittance of content, bearer of content, and recording devices, but also due to new formats, trends, and constant change of consumer behavior. The textbook *Media and Internet Management* stays abreast of changes and covers this topic on a well-founded and comprehensive basis. It makes a valuable contribution to theory and practice in media management and is highly recommendable to media managers." Christoph Mohn, Chairman of the Supervisory Board, Bertelsmann AG: "The world of media is full of challenges and dynamic conditions for its field. The dynamic of this market is accelerated even more by new digital technologies and ongoing globalization. This book is an absolute must-have for everyone who wants to know more about the basic conditions and requirements of modern media management. The analytical clearness and structure make this publication highly relevant for students but also for managers." Urs Rohner, Chairman of the Board of Directors, Credit Suisse Group AG: "Media Management is a textbook but a very welcome newcomer for students and teachers as it fills a market gap for good educational material in this rapidly evolving field. It is concise, simple, but not simplistic, and contains a contemporary overview of concepts and tools for media managers." Prof. Dr. Bożena I. Mierzejewska, Editor of *The International Journal on Media Management*, Fordham University, New York: "Summed up with his second edition, Wirtz managed to strengthen the outstanding position of his publication *Media Management*. His textbook shines because of its content, analytical clearness, and the high relevance for business practice without losing its academic background. With the second edition, this book has established its position in the field of media business as the leading standard reference book in Germany. It is suitable for business students, lectures, as well as managers who can gain magnificent information from it." Prof. Dr. Wolfgang Fritz, Director of the Institute of Marketing.
