Frank Farley and the Birds of Alberta Glen Hvenegaard, Jeremy Mouat, Heather Marshall, 2025-09-30 Frank Farley 1870 1949 was a passionate naturalist and enthusiastic booster for rural development in western Canada He supported and managed newly designated migratory bird sanctuaries networked with expert ornithologists across the continent mentored young people including famous Canadian writer and grand nephew Farley Mowat and published widely to scientific and popular audiences His most significant publication was *Birds of the Battle River Region* His data and research served as the basis for the first account of the birds of Alberta published in 1958 Farley's career shows how a single individual can make significant contributions to the fields of ornithology and environmental conservation both locally and internationally *Frank Farley and the Birds of Alberta* adds a new layer to a complex western Canadian past and will be an invaluable resource for those interested in Canadian environmental history climate change and ecological activism **McGill University**

Museum of Human Anatomy, 1930 Some nos are reprints from Annual report of the governors principal and fellows **Spirits of the Air** Shepard Krech, 2009 Before the massive environmental change wrought by the European colonization of the South hundreds of species of birds filled the region's flyways in immeasurable numbers Before disease war and displacement altered the South's earliest human landscape Native Americans hunted and ate birds and made tools and weapons from their beaks bones and talons More significant to Shepard Krech III Indians adorned themselves with feathers invoked avian powers in ceremonies and dances and incorporated bird imagery on pottery carvings and jewelry Krech a renowned authority on Native American interactions with nature reveals as never before the omnipresence of birds in Native American life From the time of the earliest known renderings of winged creatures in stone and earthworks through the nineteenth century when Native southerners took part in decimating bird species with highly valued fashionable plumage *Spirits of the Air* examines the complex and changeable influences of birds on the Native American worldview We learn of birds for which places and people were named birds common in iconography

and oral traditions birds important in ritual and healing and birds feared for their links to witches and other malevolent forces Still other birds had no meaning for Native Americans Krech shows us these invisible animals too enriching our understanding of both the Indian bird dynamic and the incredible diversity of winged life once found in the South A crowning work drawing on Krech s distinguished career in anthropology and natural history Spirits of the Air recovers vanished worlds and shows us our own anew *Trade, Industrial Policy, and International Competition, Second Edition* Richard G. Harris,2015-10-01 Richard Harris s now classic study on trade and industrial policy was written for the Royal Commission on the Economic Union and Development Prospects for Canada also known as the Macdonald Commission First published in 1985 when the Canadian economy faced dramatic changes arising from the emergence of manufacturing competitors among newly industrialized nations and increased protectionism in the US its recommendations were instrumental in the negotiation of the North America Free Trade Agreement Addressing the key issues surrounding the design and choice of policies for the Canadian economy Trade Industrial Policy and International Competition reviews the theory and evidence concerning trade liberalization as a mechanism to enhance economic growth disinvestment in sections that are disadvantageous in the international marketplace and future problems for the marketing sector caused by increasing competition from developing countries Drawing from many streams of conventional economic thinking Harris develops an original and sophisticated model for assessing the broader economic impacts of trade liberalization on the Canadian economy He concludes that free trade and industrial policy should be regarded as complementary not substitutes for one another and recommends a free trade agreement with the United States as a top priority A new introduction by David Wolfe situates this work within its time and shows how Harris s analytical insights and policy prescriptions are as relevant today as they when they were originally crafted three decades ago
