
ASHI Emergency Oxygen and First Aid Exam 2023-2024

A responsive adult must agree to receive first aid. This is known as - ANSWER Consent

When a life-threatening situation exists and an ill or injured person is unresponsive, first aid care should be given based on - ANSWER Implied consent

To "observe Universal Precautions" means - ANSWER Whether or not you think the person's blood or body fluid is infectious, you act as if it is.

When dragging a person in an emergency, DO NOT: - ANSWER Pull the person sideways or pull the head away from the neck and shoulders.

The primary assessment for an UNRESPONSIVE person includes all of the following EXCEPT: - ANSWER Checking tissue color and skin temperature.

The primary assessment for a RESPONSIVE person includes all of the following EXCEPT: - ANSWER Looking for normal breathing.

You are attending to a person who is unresponsive following an accidental overdose of pain medicine. EMS has been activated and normal breathing is present. You have placed the person in a recovery position. Why? - ANSWER To maintain and protect the airway.

You find one of your coworkers sitting in the break room alone. His skin is pale and sweaty. When you ask if he is okay, he tells you it feels like a heavy weight is on his chest. He also tells you he is having trouble catching his breath. You should provide all the following treatments EXCEPT: - ANSWER Calm, comfort, and reassure him and wait for the symptoms to subside.

You are providing care to a responsive person who has been injured in an accident. Blood is streaming out of a large wound in the leg. To control the bleeding you should: - ANSWER Apply direct pressure with a clean absorbent pad.

An injured person is shivering and his tissue color is pale. He is pleading with you for a drink of water. You should: - ANSWER Give nothing to drink and cover him with a blanket to maintain normal temperature.

You are caring for a person with a small, painful, blistered burn on the arm. You should: - ANSWER Cool it with cold water as quickly as possible and continue cooling until the pain is relieved.

Environmental Health Perspectives ,1993 Anesthesia Progress ,1978 **Essential Intensive Care** E.S.

Jones,2012-12-06 The backbone of in patient care is the hospital ward and I believe that this will remain so in the future Shortcomings in the staffing organization and layout of the conventional ward have been recognized for a long time but there have been few changes and not all these have benefited the patient The evolution of specialized treatment centres for poliomyelitis thoracic surgery burns and so on showed the need for a new staffing structure a re organization of patient care and of secondary importance new forms of accommodation These regional or referral centres serve large populations or areas and are collectively known as specialized intensive care or therapy units The idea of using similar principles of staffing organization and facilities to serve each large district hospital came much later 1959 and was first applied in the United States Thus the general intensive care unit was born a unit which would treat critically ill patients irrespective of the nature of their disease in sharp contrast to the specialized intensive care unit The staffing structure and technologies of the two are however similar Specialized intensive care consists of a single speciality or two specialities for example thoracic surgery and thoracic anaesthesia General intensive care cannot be a speciality because it embraces the whole of acute medicine acute surgery accident surgery toxicology and many more individual specialities This very diversity makes it difficult to organize but interesting to perform

Recent Advances in Aquaculture J.F. Muir,R.J. Roberts,2012-12-06 The success of the previous volumes in this series attests to the buoyancy of the current expansion of the aquaculture industry and the importance which it is beginning to achieve in the rural economies of many developed countries as well as those less favoured In the last volume emphasis was given to certain specialist areas which had become more important as the industry had acquired a more sophisticated scientific base This emphasis is continued but in each of the chapters of the present volume there are we believe many data of general significance to the farmer and the project manager as well as to the professional aquaculture scientist David Alderman of the English Ministry of Agriculture Fisheries and Food Laboratories at Weymouth Dorset provides a very detailed and deeply researched review of therapy of fish diseases This subject is important in environmental and human health terms as well as in relation to the fish themselves and is an area where all farmers and their professional veterinary advisers require considerable knowledge if they are to ensure the reputation of the industry and its produce
