Assessing Children Community Barbara Mercer:

Assessing Children in the Urban Community Barbara L. Mercer, Tricia Fong, Erin Rosenblatt, 2015-12-22 This book illuminates the process of child psychological assessment in community psychology through discussion theory and case studies of collaborative systemic treatment of children and their parents. *Assessing Children in the Urban Community* presents a semi structured form of collaborative psychological assessment designed to help clients gain new insights and make changes in their lives. Traditional psychological assessment focuses on diagnosis and treatment but has been slow to include contextual elements particularly social and cultural contexts into the assessment process and psychological report. Clients receiving services in a community psychology clinic pay for their treatment through state welfare coverage. They cannot choose their providers; they cannot always determine the length and course of their mental health care; they often do not have access to transportation to begin services, to continue them, or to take advantage of follow up recommendations. The Therapeutic Assessment model is particularly adaptable to community psychology because it allows maximum interaction in the assessment process and promotes participation and collaboration in an often disempowering system. This book will be relevant to clinical psychologists, community psychologists, social workers, family therapists, graduate students in psychology, social work, marriage and family therapists, and counseling programs.

Therapeutic Assessment with Children Deborah J. Tharinger, Dale I. Rudin, Marita Frackowiak, Stephen E. Finn, 2022-03-17 *Therapeutic Assessment with Children* presents a ground breaking paradigm of psychological assessment in which children and families collaborate with the psychologist assessor to understand persistent problems and find new ways of repairing their relationships and moving forward with their lives. This paradigm is systemic, client centered, and culturally sensitive and is applicable to families from many different backgrounds who often feel misunderstood and disempowered by traditional assessment methods. In this book, the reader will find a step by step description of Therapeutic Assessment with Children (TA-C) with ample teaching examples to make each step come alive. Each chapter includes detailed transcripts of assessment sessions with Henry, a ten year old boy and his parents as they progress through a Therapeutic Assessment and find new ways of appreciating each other and being together. The combination of didactic and clinical material will give even new clinicians a groundwork from which to begin to practice TA-C. The volume demonstrates how the core values of TA-C: collaboration, respect, humility, compassion, openness, and curiosity can be embedded in psychological assessment with children and families. *Therapeutic Assessment with Children* will be invaluable for graduate assessment courses in clinical counseling and school psychology and for seasoned professionals wanting to learn the TA-C model.

Cheung,Kanglong Liu,Riccardo Moratto,2023-12-01 Cheung Liu Moratto and their contributors examine how corpora can be effectively harnessed to benefit interpreting practice and research in East Asian settings In comparison to the achievements made in the field of corpus based translation studies the use of corpora in interpreting is not comparable in terms of scope methods and agenda One of the predicaments that hampers this line of inquiry is the lack of systematic corpora to document spoken language This issue is even more pronounced when dealing with East Asian languages such as Chinese Japanese and Korean which are typologically different from European languages As language plays a pivotal role in interpreting research the use of corpora in interpreting within East Asian contexts has its own distinct characteristics as well as methodological constraints and concerns However it also generates new insights and findings that can significantly advance this research field A valuable resource for scholars of scholars focusing on corpus interpreting particularly those dealing with East Asian languages
