Without a doubt Global Economic Trends have sustainably changed today's economic and socioeconomic landscape and the transformational power of GETs will drive industries and markets to a new secular destination However there are substantial uncertainties over future economic growth arising from the complex interplay of domestic and global determinants including such diverse factors as demographics advances in technology capital availability scarcity of resources domestic policies and global trade regimes environmental policies and financial regulations Aligning the right information to successfully plan and to implement management principles is challenging to corporations especially when addressing resource and investment decisions Therefore corporations need to establish organizational measures to incorporate the risks associated to GETs into the strategic management process and to avoid harm to the corporate portfolio The scientific contribution of this thesis is a tool called GET assessment framework which can be applied within strategic business planning to tackle risks associated to GETs The intent of the tool is to analyze the impact of a trend to the actual business situation of the corporation and to help the management to formulate and to establish counter measures within a scenario planning To prove its applicability the GET scarcity of resources is used to demonstrate how the shortage of oil is affecting a virtual corporation that is operating within the chemical industry which is a recent problem to business planning in the industry Using the concept of corporate evaluation which is introduced within the assessment framework potential risks are identified By this means external risks are mapped to the internal environment of the corporation and countermeasures are developed Como escolher e administrar seus investimentos Guilherme Rebouças de Oliveira,2021-10-07 Se o leitor est procura de mais um manual de produtos financeiros bateu na porta errada Se quer aprender caminhos que podem lev lo a investir melhor e ter retornos mais consistentes v em frente Projeto desenvolvido ao longo de v rios anos Como escolher e administrar seus investimentos requereu grande maturidade experi ncia de mercado e amplo dom nio da bibliografia internacional e busca contribuir para a forma o de investidores com uma vis o mais hol stica do mundo dos investimentos N o existe uma receita do sucesso mas existem conceitos teoria e racioc nios que precisam ser conhecidos e estudados para que os investidores possam evoluir e criar os seus pr prios caminhos Novos conhecimentos como filosofia hist ria literatura biologia f sica e psicologia passam a fazer parte dos skills necess rios para ser um investidor bem sucedido Um livro que ao mesmo tempo acess vel e informativo a quem se inicia no mundo dos investimentos e suficientemente profundo para o investidor experiente Strategies in Personal Finance Keith V. Smith,Jane A. Smith,2005 Every family should have financial goals for the future Being unprepared can lead to monetary chaos Financial Management of Your Future deals with strategies for accomplishing financial goals

What investment returns are necessary to achieve explicit family goals How are returns logically related to risks for investment opportunities that are considered Can different families have different tolerances for experiencing investment risk Why is asset allocation the key investment decision for most families What are the characteristics and valuations of bonds stocks mutual funds real estate and international securities that a family might consider How should a family construct monitor and revise a portfolio of investments over time How should careful estate planning be done by a family in order to delay or avoid taxes in passing on property to their children grandchildren and favorite charities And how can some of the concepts and techniques from modern portfolio theory be helpful to a family as it attempts to answer these questions This book deals with financial strategies for three adult age categories 1 Families of ages twenty to forty in the earlier years of active employment child raising and the beginning of saving for retirement 2 Families of ages forty to sixty in their years of maximum income high educational expenses for their children and more serious thinking about forthcoming retirement and 3 Families of ages sixty to eighty having retired or approaching full retirement
