Australian Secret Manual Government:

Green Australia Steve Lancaster, 2012 Green Australia A snapshot examines the ways in which Australians are attempting to reduce their ecological footprint both at home and at work In 2009 the CO2 Energy Emissions Index found that Australia had overtaken the USA to become the largest per capita emitter of greenhouse gases in the world a legacy of dependence on coal fired power stations the widespread adoption of conventional farming techniques heavy reliance on vehicles powered by fossil fuel dirty industrial practices and a growing mountain of waste Yet in recent years there has been a growing awareness that climate change is beginning to bite the recent drought and devastating floods suggesting that more extreme weather patterns are likely unless significant steps are taken to combat global warming Using case studies and up to date research this book demonstrates that although much more needs to be done if Australia is to secure a carbon neutral future some Green shoots are beginning to emerge

Domestic Deployment of the Armed Forces Michael Head, Scott Mann, 2016-05-13 Until recently internal use of the armed forces has been generally regarded by the public as well as academic commentators as conduct to be expected of a military or autocratic regime not a democratic government There is however growing concern that the war on terror has been used to condition public opinion to accept the internal deployment of the armed forces including for broader industrial and political purposes This book examines the national and international law human rights and civil liberties issues involved in governments calling out troops to deal with civil unrest or terrorism As the introduction of military call out legislation has become an emerging global trend in the opening years of the 21st century there is considerable and growing interest in the constitutional and related problems surrounding the deployment of military forces for domestic purposes Examining the changes underway in six comparable countries the United States Canada Britain Germany Japan and Australia this book provides a review and analysis of this trend including its implications for legal and political rights

Networks and National Security Chad Whelan, 2016-04-29 Networks as sets of autonomous organisations working together to achieve individual and shared goals are becoming increasingly important across many areas of public administration The importance of networks is well known but most analysts would agree that we do not know enough about the dynamics and effectiveness of networks in relation to their internal operations This is a significant problem as security intelligence law enforcement and many other agencies are increasingly required to organise in and through networks to provide national security In this comprehensive analysis Chad Whelan presents a highly innovative qualitative study of networks in the field of national security Developing our understanding of organisational networks in organisational theory management and public administration and security networks in criminology and international relations he presents a multi disciplinary analysis of network forms of organisation Whelan puts forward a methodological framework involving five levels of analysis structural cultural policy technological and relational with which we can better analyse and understand the dynamics and effectiveness of networks This framework is applied to public sector networks operating in the field of counter terrorism in Australia in a way that is highly relevant to researchers and practitioners in many contexts where government departments and agencies and the private sector need to work together Networks and National Security Dynamics Effectiveness and Organisation not only advances our knowledge of networks and national security but also assists with the essential tasks of evaluating and managing networks Written in a clear and accessible style and featuring a wealth of first
