being debated tested and implemented wherever you look across the built environment sector This book is about Heritage
Building Information Modelling HBIM which necessarily differs from the commonplace applications of BIM to new
construction Where BIM is being used the focus is still very much on design and construction However its use as an
operational and management tool for existing buildings particularly heritage buildings is lagging behind The first of its kind
this book aims to clearly define the scope for HBIM and present cutting edge research findings alongside international case
studies before outlining challenges for the future of HBIM research and practice After an extensive introduction to HBIM the
core themes of the book are arranged into four parts Restoration philosophies in practice Data capture and visualisation for
maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built
environment practitioners researchers academics and students engaged in BIM HBIM building energy modelling building
