Body Language for Business Badi al Zaman Kouri, 2014-11-30 Body language refers to various forms of nonverbal communication wherein a person may reveal clues as to some unspoken intention or feeling through their physical behavior These behaviors include but are not limited to facial expressions body posture gestures eye movement touch and the use of space Body language exists in both animals and humans but this article focuses on interpretations of human body language It is also known as kinesics Body language must not be confused with sign language as sign languages are full languages like spoken languages and have their own complex grammar systems as well as being able to exhibit the fundamental properties that exist in all languages Body language on the other hand does not have a grammar and must be interpreted broadly instead of having an absolute meaning corresponding with a certain movement so it is not a language like sign language and is simply termed as a language due to popular culture In a community there are agreed upon interpretations of particular behavior Interpretations may vary from country to country or culture to culture On this note there is controversy on whether body language is universal Body language a subset of nonverbal communication complements verbal communication in social interaction In fact some researchers conclude that nonverbal communication accounts for the majority of information transmitted during interpersonal interactions It helps to establish the relationship between two people and regulates interaction but can be ambiguous Hence it is crucial to accurately read body language to avoid misunderstanding in social interactions
