for beginners and low intermediate students that focuses on the language used in common everyday functions and situations. The expressions are easy to learn and can be used immediately to communicate with others. The functions covered include introductions, making comparisons, giving instructions and directions, describing people, and giving help. The situations include language and vocabulary used in restaurants, hotels, airports, and banks. AND MUCH MORE. *Bilingualism and Identity* Mercedes Niño-Murcia, Jason Rothman, 2008. Sociolinguists have been pursuing connections between language and identity for several decades. But how are language and identity related in bilingualism and multilingualism? Mobilizing the most current methodology, this collection presents new research on language identity and bilingualism in three regions where Spanish coexists with other languages. The cases are Spanish-English contact in the United States, Spanish-indigenous language contact in Latin America, and Spanish-regional language contact in Spain. This is the first comparativist book to examine language and identity construction among bi- or multilingual speakers while keeping one of the languages constant. The sociolinguistic standing of Spanish varies among the three regions, depending on whether or not it is a language of prestige. Comparisons therefore afford a strong constructivist perspective on how linguistic ideologies affect bi-multilingual identity formation.
