[Marxism and Ecological Economics](#) Paul Burkett, 2006-03-01 This book undertakes the first general assessment of ecological economics from a Marxist point of view and shows how Marxist political economy can make a substantial contribution to ecological economics The analysis is developed in terms of four basic issues 1 nature and economic value 2 the treatment of nature as capital 3 the significance of the entropy law for economic systems 4 the concept of sustainable development In each case it is shown that Marxism can help ecological economics fulfill its commitments to multi disciplinary methodological pluralism and historical openness In this way a foundation is constructed for a substantive dialogue between Marxists and ecological economists
