

HOW TO WRITE AN EFFECTIVE RESEARCH PAPER

Structure of a scientific paper

Introduction

- Start the section with a general background of the topic.
- Add 2-3 paragraphs that discuss previous work.
- Point out issues that are being addressed in the present work.

Experimental Section

- Divide this section into Materials & Methods, Characterization, Measurements and Data analysis

Results and Discussion

- (These two sections can be combined or separate)
- Describe the results in detail and include a healthy, detailed discussion
 - The order of figures should follow the discussion themes and not the sequence they were conducted
 - Discuss how your data compare or contrast with previous results.
 - Include schemes, photographs to enhance the scope of discussion

An Introduction To Scientific Research:

An Introduction to Scientific Research Edgar Bright Wilson, 1990-01-01 Noted scientist's exceptionally clear pragmatic guide to principles and procedures useful in a wide range of sciences Design of experiments and apparatus classification sampling and measurement analysis of experimental data errors of measurement probability randomness and logic much more Indispensable for any researcher 1952 edition 49 illustrations *An Introduction to Scientific Research* Edgar Bright Wilson, 1966 **An Introduction to Scientific Research** E. Bright Jr Wilson, 1952 [An Introduction to Scientific Research Methods in Geography and Environmental Studies](#) Daniel Montello, Paul Sutton, 2012-12-10 Covers a broad range of subjects that undergraduates in the discipline should be familiar and comfortable with upon graduation From chapters on the scientific method and fundamental research concepts to experimental design sampling and statistical analysis the text offers an excellent introduction to the key concepts of geographical research The content is applicable for students at the beginning of their studies right through to planning and conducting dissertations The book has also been of particular support in designing my level 1 and 2 tutorials which cover similar ground to several of the chapters Joseph Mallalieu School of Geography Leeds University Montello and Sutton is one of the best texts I've used in seminars on research methodology The text offers a clear balance of quantitative vs qualitative and physical vs human which I've found particularly valuable The chapters on research ethics scientific communication information technologies and data visualization are excellent Kenneth E Foote Department of Geography University of Colorado at Boulder This is a broad and integrative introduction to the conduct and interpretation of scientific research covering both geography and environmental studies Written for undergraduate and postgraduate students it Explains both the conceptual and the technical aspects of research as well as all phases of the research process Combines approaches in physical geography and environmental science human geography and human environment relations and geographic and environmental information techniques such as GIS cartography and remote sensing Combines natural and social scientific approaches common to subjects in geography and environmental studies Includes case studies of actual research projects to demonstrate the breadth of approaches taken It will be core reading for students studying scientific research methods in geography environmental studies and related disciplines such as planning and earth science [An Introduction to Scientific Research](#) Rajani Palme Dutt, 1952 **An Introduction to Scientific Research** E. B. Wilson Junior, 1952 The choice and statement of a research problem Searching the literature Elementary scientific method Design of experiments The design of apparatus The execution of experiments Classification sampling and measurement The analysis of experimental data Errors of measurement Probability randomness and logic Mathematical work Numerical computations Reporting the results of research *Introduction to Scientific Research Projects* Graham Basten, 2011 **Introduction to Scientific Research** Wendi Wolfram, 2018-12-15 Introduction to Scientific Research Strategy and Planning is designed as an introductory primer for students interested in conducting

research focused in both environmental and natural sciences. The book introduces concepts for the novice while providing instrumental recaps for a more seasoned researcher. Because the thought of developing and conducting an individual research project for the first time can seem a surmountable task, having a primer to review the process and aid in breaking out the steps can be most valuable. The book is designed to explain the basic aspects of research using the scientific method and provides select examples along with concept applications and guidance on developing a written plan to conduct an individual research project. The text further explains how to modify a written plan to facilitate a variety of funding venues as well as briefly addressing ethical issues associated with research.
