Auto Tune Manual:

Manual of Radiosonde Observations (WBAN) United States. Weather Bureau,1957 Automatic Tuning of Compilers Using Machine Learning Amir H. Ashouri,Gianluca Palermo,John Cavazos,Cristina Silvano,2017-12-22 This book explores break through approaches to tackling and mitigating the well known problems of compiler optimization using design space exploration and machine learning techniques It demonstrates that not all the optimization passes are suitable for use within an optimization sequence and that in fact many of the available passes tend to counteract one another After providing a comprehensive survey of currently available methodologies including many experimental comparisons with state of the art compiler frameworks the book describes new approaches to solving the problem of selecting the best compiler optimizations and the phase ordering problem allowing readers to overcome the enormous complexity of choosing the right order of optimizations for each code segment in an application As such the book offers a valuable resource for a broad readership including researchers interested in Computer Architecture Electronic Design Automation and Machine Learning as well as computer architects and compiler developers Manual NGB.
