Ashok Kumar, M Senthil kumar, 2018-03-20 Automation is the use of various control systems for operating equipment such as machinery and processes In line this book deals with comprehensive analysis of the trends and technologies in automation and control systems used in textile engineering The control systems described in all chapters is to dissect the important components of an integrated control system in spinning weaving knitting chemical processing and garment industries and then to determine if and how the components are converging to provide manageable and reliable systems throughout the chain from fiber to the ultimate customer Key Features Describes the design features of machinery for operating various textile machineries in product manufacturing Covers the fundamentals of the instrumentation and control engineering used in textile machineries Illustrates sensors and basic elements for textile automation Highlights the need of robotics in textile engineering Reviews the overall idea and scope of research in designing textile machineries *Control Engineering* Rao Ganesh, 2010-09 **Classical Control System** Kunal Chakraborty, 2016-04-15 The Temperature measurement of liquid in a tank can be controlled by classical and advance control algorithms applying PID FUZZY LOGIC SFB LQR Here we consider a three tank noninteracting system We observed that tank1 affects the dynamic behavior of tank2 Similarly tank2 affects the dynamic behavior of tank3 and vice versa because the flow rate F_1 depends on the difference between liquid levels h_1 and h_2 Thus a change in the inlet flowrate affects the liquid level in the tank which in turn affects the temperature of the liquid Basically it is a thermal process Various types of temperature sensors include RTD T C and Thermistor In this particular project the author used a mercury thermometer as sensor Mathematical models of the three tank method give a third order equation Each tank gives a transfer function of the first order system They make it easy to check whether a particular algorithm is giving the requisite results A lot of work has been carried out on the temperature control in terms of its stabilization Many attempts have been made to control the response of temperature measuring systems Design of
