Australian Architecture Now:

Australian Architecture Now Davina Jackson, Chris Johnson, 2000 Having just completed the most significant five year construction phase in the nation's history Australian architecture has moved into the world spotlight During the 1994-99 boom creative vigor was palpable confidence surged and the entire continent became endowed with a new sense of architectural independence Because it scans a diverse and momentary scene instead of recording a longer continuum of major achievements *Australian Architecture Now* is an unusual history book It presents two essays 21 case studies of outstanding public and domestic projects and in several brief chapters compares selected buildings according to similarities of either genre or style Close examination reveals surprising evidence that Australian architecture more often reflects the personal styles and attitudes of its creators than the poetic ideal of a unique sense of place Architects featured include Denton Corker Marshall Harry Seidler Gabriel Poole Rex Addison Peter Stutchbury Cox Sanderson Ness Nonda Katsalidis Sean Godsell Alexander Tzannes and more

Next Wave Davina Jackson, 2007-10-15 *Next Wave* presents the work of sixteen of the country's most talented and cutting edge studios Following in the footsteps of Murcutt this next generation has developed the language he established while assimilating a broad range of new influences from pop culture to digital experimentation

Australia Harry Margalit, 2019-11-15 This book tells the story of the architects and buildings that have defined Australia's architectural culture since the founding of the modern nation through Federation in 1901 That year marked the beginning of a search for better city forms and buildings to accommodate the changing realities of Australian life and to express an emerging distinctive and eventually confident Australian identity While Sydney and Melbourne were the settings for many of the major buildings all states and territories developed architectural traditions based on distinctive histories and climates Harry Margalit explores the flowering of these many architectural variants from the bid to create a model city in Canberra through the stylistic battles that opened a space for modernism to the idealism of postwar reconstruction and beyond to the new millennium Australia reveals a vibrant and influential culture of the built environment at its best when it matches civic idealism with the sensuality of a country of stunning light and landscapes

Architects Today Kester Rattenbury, Robert Bevan, Kieran Long, 2006-08-10 This volume offers both an introduction to and an insight into key contemporary architects as well as giving a snapshot of the varied nature of architecture today For each architect there are details of their life and work and illustrations of their most representative and iconic buildings
