Australian Tropical Rainforests Science Values Meaning:

Phytochemistry of Australia's Tropical Rainforest Cheryll J. Williams, 2021-12-01 Rare unique and irreplaceable precious native rainforests occupy a precariously small part of Australia while retaining a remarkable level of both biological and chemical diversity unrivalled by any other ecosystem Australia's ancient history and traditions are intimately intertwined with the rainforest plants that humans have utilised as both food and medicine Phytochemistry of Australia's Tropical Rainforest is a record of this history and details how our understanding of these plants has led to the discovery of anaesthetics analgesics steroids antimalarials and more It provides an insight into the habitat ecology and family associations of hundreds of species and explores their future therapeutic potential alongside phytochemical studies of the ancient plant lineages Toxicological evaluations of important poisonous plants are also included Rainforests provide shelter for unique flora and fauna that are counted among the rarest species on Earth many of which are illustrated in this book This comprehensive work is an essential reference for phytochemists ethnobotanists and those with an interest in rainforests and their medicinal and botanical potential

Australian Tropical Rainforests Jiro Kikkawa, 1990 Based on contributions to a symposium at the 57th ANZAAS congress in 1987 this book describes and interprets the evolution biology and dynamics of Australia's northern rainforests from scientific humanistic and eco-political viewpoints Includes references and an index

Tropical Rainforests Eldredge Bermingham, Christopher W. Dick, Craig Moritz, 2005-08 Synthesizing theoretical empirical analyses of the processes that help shape these unique ecosystems Tropical Rainforests looks at the effects of evolutionary histories past climate change ecological dynamics on the origin maintenance of tropical rainforest communities

Australia's Biodiversity and Climate Change Will Steffen, Andrew A. Burbidge, Lesley Hughes, Roger Kitching, David Lindenmayer, Warren Musgrave, Mark Stafford Smith, Patricia A. Werner, 2009 Australia's unique biodiversity is under threat from a rapidly changing climate The effects of climate change are already discernible at all levels of biodiversity genes species communities and ecosystems Many of Australia's most valued and iconic natural areas the Great Barrier Reef south western Australia the Kakadu wetlands and the Australian Alps are among the most vulnerable But much more is at stake than saving iconic species or ecosystems Australia's biodiversity is fundamental to the country's national identity economy and quality of life In the face of uncertainty about specific climate scenarios ecological and management principles provide a sound basis for maximising opportunities for species to adapt communities to reorganise and ecosystems to transform while maintaining basic functions critical to human society This innovative approach to biodiversity conservation under a changing climate leads to new challenges for management policy development and institutional design This book explores these challenges building on a detailed analysis of the interactions between a changing climate and Australia's rich but threatened biodiversity Australia's Biodiversity and Climate Change is an important reference for policy makers researchers educators students journalists environmental and conservation NGOs NRM managers and private landholders with an interest in

biodiversity conservation in a rapidly changing world Publisher Tropical Rainforest Research in Australia Nicola Goudberg, Michael Bonell, Dominique Benzaken, 1991 **Journeys into the Rainforest (Terra Australis 43)** Åsa Ferrier, 2015-11-27 This monograph presents the results of archaeological research that takes a longitudinal approach to interpreting and understanding Aboriginal European contact It focuses on a small but unique area of tropical rainforest in far north Queensland s Wet Tropics Bioregion located within the traditional lands of the Jirrbal Aboriginal people on the Evelyn Tableland The research integrates a diverse range of data sources archaeological evidence recovered from Aboriginal open sites occupied in the pre to post contact periods historical documents of early ethnographers settlers and explorers in the region supplemented with Aboriginal oral history testimony Analyses of the archaeological evidence excavated from three open sites facilitated the identification of the trajectories of culture change and continuity that this investigation focused on Aboriginal rainforest material culture and technology plant subsistence strategies and rainforest settlement patterns Analyses of the data sets demonstrate that initial use of the rainforest environment on the Evelyn Tableland occurred during the early Holocene period with successful adaptation and a change towards more permanent Aboriginal use of the rainforest becoming established in the late Holocene period European arrival and settlement on traditional Aboriginal land resulted in a period of historical upheaval for the Aboriginal rainforest people Following an initial period of violent interactions and strong Aboriginal resistance from the rainforest Jirrbal Aboriginal people continued to adapt and transform their traditional culture to accommodate for the many changes forced upon them throughout the post contact period *Old Fields* Richard J. Hobbs, 2012-06-22 Land abandonment is increasing as human influence on the globe intensifies and various ecological social and economic factors conspire to force the cessation of agriculture and other forms of land management The old fields that result from abandonment have been the subject of much study yet few attempts have been made to examine the larger questions raised by old field dynamics *Old Fields* brings together leading experts from around the world to synthesize past and current work on old fields providing an up to date perspective on the ecological dynamics of abandoned land The book gives readers a broad understanding of why agricultural land is abandoned the factors that determine the ecological recovery of old fields and how this understanding contributes to theoretical and applied ecology Twelve case studies from diverse geographical and climatic areas including Australian rainforest Brazilian Amazonia New Jersey piedmont and South African renosterveld offer a global perspective on the causes and results of land abandonment Concluding chapters consider the similarities and differences among the case studies examine them in the context of ecological concepts and discuss their relevance to the growing field of restoration ecology *Old Fields* is the first book to draw together studies on old fields from both a theoretical and practical perspective It represents an important contribution to the development of theory on old field dynamics and the practice of ecological restoration on abandoned farmland and the broader implications of old field dynamics to ecology and restoration **Australian Rainforest Seeds** Michelle Chapman, Paul Nelson, Hugh

Nicholson, Mark Dunphy, Steve McAlpin, 2020-02-03 Have you ever wondered how to grow your own rainforest trees Is there a beautiful tree that you have always wanted to collect and propagate the seed from Are you in the business of ecological restoration rainforest propagation or environmental education This long awaited guide to rainforest seed propagation unlocks the secrets to growing 300 rainforest species Providing specific information on how to sustainably collect process and germinate seeds this user friendly book aims to support a growing movement of rainforest restoration With invaluable information based on 30 years of research in northern New South Wales users will find even difficult rainforest species delightfully easy to grow Seeing a seed germinate caring for the seedling and eventually planting the tree is deeply satisfying And in this time of widespread deforestation millions of trees are needed for restoration and every tree counts Whether you are growing one or one hundred thousand why not start today **Tropical Forest Remnants** William F. Laurance, Richard O. Bierregaard, 1997-06-21 We live in an increasingly fragmented world with islands of natural habitat cast adrift in a sea of cleared burned logged polluted and otherwise altered lands Nowhere are fragmentation and its devastating effects more evident than in the tropical forests By the year 2000 more than half of these forests will have been cut causing increased soil erosion watershed destabilization climate degradation and extinction of as many as 600 000 species Tropical Forest Remnants provides the best information available to help us understand manage and conserve the remaining fragments Covering geographic areas from Southeast Asia and Australia to Madagascar and the New World this volume summarizes what is known about the ecology management restoration socioeconomics and conservation of fragmented forests Thirty three papers present results of recent research as well as updates from decades long projects in progress Two final chapters synthesize the state of research on tropical forest fragmentation and identify key priorities for future work *Australian Mammal Society* ,1991-06
