Questioning the Language of Improvement and Reform in Education Nicole Mockler, Susan

Groundwater-Smith, 2018-05-11 Questioning the Language of Improvement and Reform in Education challenges the language used in education by linking the language of both the public and professional domains with the changing intentions of the governance of education Exploring various issues which embody the many manifestations of the manner in which strident conservative language has captured the public view of education the book covers topics such as the importance of language in the context of educational practice the media's portrayal of teachers globally the role of students in the face of curriculum reform and the language used in educational policy worldwide The book addresses the ways in which the words improvement and reform have been appropriated and hollowed out by policymakers in order to justify globalised education policies Using international case studies and reports the authors argue that the employment of specific words masks the reality that new educational policies are regressive and require re-examination while perpetuating the illusion that progressive educational practice is being brought to the fore Questioning the Language of Improvement and Reform in Education is a fascinating and original take on this topic which will be of great interest to educational practitioners policymakers and linguists

Improving Schools Shaun Rawolle, Muriel Wells, Louise Paatsch, Russell Tytler, Coral Campbell, 2015-10-22 This unique

book explores school improvement policy from its translation into national contexts and school networks to its implementation in leader and teacher practices in individual schools and classrooms within this network of schools and its impact on students learning It draws on multiple conceptual and theoretical resources to explore the complexities attached to a school improvement process in a network of schools in Australia These conceptual and theoretical resources include discourse practice representation and network concepts common to both policy research as well as studies of leadership and classroom practice They lead to a more detailed understanding of the intersections between educational policy and intervention processes and the complex reality of school processes and teaching practices In the book we trace the implementation of school improvement policies through its multiple phases levels and contexts Our data collection and analysis methods draw on a variety of perspectives in the way different players perceive their roles and the nature of the initiative and the ways in which these intersect The research findings are used to seek productive approaches to school improvement that combine policy integrity with local flexibility The book contributes to the school improvement literature through its exploration of tensions between global and systemic settings and local practices and histories
