

AUTOBIOGRAPHICAL ESSAY

In this autobiography, I will talk about my life until this point in time. I am John Smith. I was born on February 8th, 1997, in the state of Miami. Being half German, my mother is from Germany, as my father is an American. In my childhood, I experienced both ways of life. I lived in Germany for a couple of years during my childhood. As my parents got job offers in Germany. Though, I spent most of my life in the US. And now, I am studying Literature at EssayPro university. Growing up, mostly in Miami, I lived in a typical house — in a middle-class family. My father works as a psychologist in a mental health institution as my mother works for a large high school as a mathematics teacher. I grew up with two other children — both a brother and a sister. Despite the age difference, my brother is older, and my sister is younger despite. We all got on very well while growing up.

I am now 22 years old. I have always enjoyed education, ever since being a young child. During my high school years, I was never a popular child. I used to spend most of my days in the school library. In which the school librarian allowed me to take as many books as I wanted. She was a cool librarian. Though, she only twisted the school's regulations for me. As she knew I love reading.

I was academically strong throughout my years in secondary education. I have never held back a grade, in which many of my classmates were. I have been studying hard from the age of 12 to this day. My specialty is English literature. I can also speak and read German fluently. Thus, I also enjoy some German writing. I don't study German literature. Reimbursing myself in German literature is merely my way of escaping the nature of reality for a short while. It's my way of relaxing - as other people enjoy watching X Factor and Netflix programs.

Nowadays, I am working my part-time job as a waiter in Thank God it's Fridays. I don't enjoy this job. Though, it enables me to get through my university studies more efficiently. My day usually consists of 3 hours serving at TGI Fridays, then 5 hours of lectures scattered throughout the afternoon. I enjoy learning something new every day.

My aim in the future to become an English literature teacher. My mother, being the primary influence for me becoming a teacher. I did consider becoming a mental health psychologist. Though, many stories put me off that idea.

In my experience, I have taught some elementary classes. The first took place in Miami Elementary School. It was class 4B, and they were eager to learn their required learning material. The behavior was wonderful.

The first thing I taught them was their times-tables. What I did was create a song for them — as I brought my guitar into my first day. I played the times-tables song on my guitar and sang it to them. After, I gave them a little quiz on their times- tables. In which many of them got around 50% scores.

second thing was peer work. I got them to work together in twos or threes. In which, their task was to come up with as many times table sums as possible. It didn't matter how complex or simple they were. I then asked them to swap their papers with their peer groups. They were then required to provide answers to these sums with explanations.

Most of them got their equations incorrect. So I taught them the natural way of answering any times-table sum. I explained to them that the way to do that is by taking away the second digit.

Numbers and Narratives Maria Tamboukou, 2025-09-10 Why have there been so few women mathematicians This book does not seek an answer in absence but in the forces ruptures and intensities that shape the becoming of a femme philosophe a mathematician scientist and philosopher within the shifting assemblages of eighteenth and nineteenth century Europe Moving beyond exclusion as mere negation it traces the conditions of emergence the differential speeds and slippages through which women entered inhabited and transformed the mathematical sciences Drawing on auto biographical documents literary and philosophical writings and the materialities of the archive this book approaches the digital turn not as a tool but as a plane of composition where new trajectories of memory work unfold Between historiography and fabulation it maps a space where women's mathematical thought was not only possible but inevitable if only in flashes excesses and detours This book will resonate with scholars in the sociology history and philosophy of science and mathematics particularly those engaged with feminist thought the politics of knowledge and experimental archival methods

The Philosophy of Autobiography Christopher Cowley, 2015-10-26 This book promises to be the first of its kind a philosophical investigation of autobiographical writing All of us are autobiographers at least some of the time and all of us crave certain kinds of recognition and confirmation from others just as we fear blame and reproach from those who know us well The philosophy of autobiography examines this fundamental story telling process and its place in our lives As such it straddles a number of long standing philosophical questions having to do with the meaning of life the problems of autonomy and responsibility and authenticity the nature of self deception and bad faith the structure of the self and its existence through time the question of the reliability and meaning of memory and the problem of understanding another person and imaginatively identifying with him The contributors to the volume are mostly philosophers

but many of them have interests outside philosophy and have been informed by research findings from literary theory and from psychiatry Some of the contributors are also literary theorists and one of them has even published autobiographical work Contributors also examine specific autobiographies and diaries of philosophers and non philosophers as well as fictional works using an autobiographical format in order to explore the philosophical implications and presuppositions of the genre The result is a most useful and productive interdisciplinary exchange
