Blood That Cries Out From The Earth The Psychology Of Religious Terrorism:

Blood That Cries Out From the Earth James Jones, 2008-04-11 As both a clinical psychologist and an authority on comparative religion James W Jones is uniquely qualified to address the increasingly urgent issue of religious terrorism Research on the psychology of violence shows that several factors work to make ordinary people turn evil Authoritarian religion or fundamentalism Jones shows is a particularly rich source of such ideas and feelings which he finds throughout the writings of Islamic jihadists Jones notes that not every adherent of an authoritarian group will turn to violence and he shows how theories of personality development can explain why certain individuals are easily recruited **The Justification of Religious Violence**, 2014-03-06 How are justifications for religious violence developed and do they differ from secular justifications for violence Can liberal societies tolerate potentially violent religious groups Can those who accept religious justifications for violence be dissuaded from acting violently Including six in depth contemporary case studies The Justification of Religious Violence is the first book to examine the logical structure of justifications of religious violence The first book specifically devoted to examining the logical structure of justifications of religious violence Seeks to understand how justifications for religious violence are developed and how or if they differ from ordinary secular justifications of violence Examines 3 widely employed premises used in religious justifications of violence cosmic war the importance of the afterlife and sacred values Considers to what extent liberal democratic societies should tolerate who hold that their religion justifies violent acts Reflects on the possibility of effective policy measures to persuade those who believe that violent action is justified by religion to refrain from acting violently Informed by recent work in psychology cognitive science neuroscience and evolutionary biology Part of the Blackwell Public Philosophy Series *Early Trauma, Loneliness, the Indoctrinated Self, and the Need for Compassionate Empathy* Thomas G. Arizmendi, 2024-02-14 This book focuses on some of the detrimental effects of early trauma by detailing the particular outcomes of loneliness and heightened vulnerability to indoctrination These stress states are present at virtually pandemic levels In terms of loneliness the author goes well beyond the mental health consequences outlining the numerous medical conditions it may lead to such as heart disease immune system problems and many others Indoctrination processes are present in all walks of life no one is immune In extreme states of indoctrination such as in fundamentalism violence may be the result as we have seen with many wars and acts of terrorism Overall efforts to indoctrinate often play a huge role in forming our divided world Two notions in this book are unique the focus on environmental sensitivity as a critical force in determining levels of vulnerability to stressful events and the emphasis on compassionate empathy to repair unmet needs stemming from trauma Extremist Islam Kumar Ramakrishna, 2022 Since the Bali terrorist attacks in 2002 law enforcement agencies have rigorously combatted terrorist networks in Southeast Asia yet groups motivated by violent extremist interpretations of Islam remain resilient and dangerous This book shines a light on specific beliefs behaviors and policies that impact these challenges ultimately offering cutting edge effective tools for

response The book begins by challenging misguided and controversial notions that depict Islam as an inherently violent religion arguing that the theological ideological amalgam of what has been called Salafabism is the more useful lens for recognizing closed minded extremist currents The book carefully distinguishes this Salafabist extremist mindset from relatively open minded Salafabist radicalism paying due attention to nonviolent extremists and the ways they can contribute to rather than reduce violent terrorist activity in the region Using poignant case studies from Malaysia Singapore the Philippines and Indonesia the book clarifies a bewildering range of terminology associated with Islamist violence and explains how imprecise and oversimplified narratives are destructive to progress and worse empowering to terrorist organizations These chapters build up to research informed policies and rhetorical recommendations for improved outcomes With its novel insights into the root causes of extremist terrorism in Southeast Asia the ineffective policies that prohibit progress and promote unrest in this region and the avenues for positive change this book offers a comprehensive strategy for fostering theologically sound yet culturally authentic counterterrorist measures that defend the complex richly textured tapestry of culture in Southeast Asia

The Darkest Sides of Politics, I Jeffrey M. Bale, 2017-09-04 This book examines a wide array of phenomena that arguably constitute the most noxious extreme terrifying murderous secretive authoritarian and or anti democratic aspects of national and international politics Scholars should not ignore these dark sides of politics however unpleasant they may be since they influence the world in a multitude of harmful ways The first volume in this two volume collection focuses on the history of underground neo fascist networks in the post World War II era neo fascist paramilitary and terrorist groups operating in Europe and Latin America in the 1960s and 1970s and the manipulation of those and other terrorist organizations by the security forces of various states both authoritarian and democratic A range of global case studies are included all of which focus on the lesser known activities of certain secular extremist milieus This collection should prove to be essential reading for students and researchers interested in understanding seemingly arcane but nonetheless important dimensions of recent historical and contemporary politics

The Oxford Handbook of Religion and Violence Mark Juergensmeyer, Margo Kitts, Michael K. Jerryson, 2015-11 Violence has always played a part in the religious imagination from symbols and myths to legendary battles from colossal wars to the theater of terrorism The Oxford Handbook of Religion and Violence surveys intersections between religion and violence throughout history and around the world The forty original essays in this volume include overviews of major religious traditions showing how violence is justified within the literary and theological foundations of the tradition how it is used symbolically and in ritual practice and how social acts of violence and warfare have been justified by religious ideas The essays also examine patterns and themes relating to religious violence such as sacrifice and martyrdom which are explored in cross disciplinary or regional analyses and offer major analytic approaches from literary to social scientific studies The contributors to this volume innovative thinkers who are forging new directions in theory and analysis related to religion and violence provide novel insights into this

important field of studies By mapping out the whole field of religion and violence The Oxford Handbook of Religion and Violence will prove an authoritative source for students and scholars for years to come **Relating God and the Self** Jan-Olav Henriksen, 2016-04-08 Religion is not only about understanding the world it is just as much about how to develop and shape the self's experience of itself Because the religious self is shaped by our symbols of God and symbols of God are also shaped by the self theology and philosophy of religion cannot ignore this interplay or the psychological dimension when they discuss what symbols of God are adequate and not By discussing critically different ways the symbol of God functions in the formation of the self the book develops a nuanced and original approach to the interplay between God and the self It suggests that play is actually an important metaphor in order to develop a dynamic understanding of religion's way of relating God and the Self This approach challenges understandings of religion focussing only its cognitive claims as well as those who emphasize doctrinal orthodoxy as the most important element in religion **On Holy Ground: The Theory and Practice of Religious Education** Liam Gearon, 2013-07-18 Religion has had notable and renewed prominence in contemporary public and political life Religious questions have also been freshly examined in philosophy and theology the natural sciences the social sciences psychology phenomenology politics and the arts These fields reflect complex multi disciplinary understandings of religion some hostile some accommodating For religious education this has all contributed to its own international renaissance Religious education in ensuring it is contemporary shares with these fields the same criticality the same distance between the study of religion and the religious life Yet what are the grounds of this modern religious education Through a systematic historical and contemporary cross disciplinary analysis answering this question is the ambitious task of the book Chapters include philosophy theology and religious education the natural sciences and religious education the social sciences and religious education psychology spirituality and religious education phenomenology and religious education the politics of religious education the aesthetics of religious education The central problem of all modern religious education remains this what are the grounds of religious education when religious education is no longer grounded in the religious life in the life of the holy Although this primarily appears to be an epistemological problem it soon becomes a moral and existential one The book will be of key interest to teachers theorists and researchers working in religious education **Driven to Death** Ariel Merari, 2010-12-02 The deepest study yet of one of the least understood phenomena of our time A scholarly work that read like a page turner Bob Simon CBS News Chief Middle Eastern correspondent and recipient of the Edward Weintal Prize for Diplomatic Reporting **Theology after the Birth of God** F. Shults, 2014-08-07 Engaging recent developments within the bio cultural study of religion Shults unveils the evolved cognitive and coalitional mechanisms by which god conceptions are engendered in minds and nurtured in societies He discovers and attempts to liberate a radically atheist trajectory that has long been suppressed within the discipline of theology
