

SOLUTIONS MANUAL Financial Accounting 9th Edition by Craig Deegan.

PART 1: THE AUSTRALIAN ACCOUNTING ENVIRONMENT

Chapter 1

An overview of the Australian external reporting environment

Opening questions

1.1 What is 'general purpose financial reporting'?

General purpose financial reporting generates general purpose financial statements, which are those financial statements that are intended to meet the information needs of users who are not in a position to require an entity to prepare reports tailored to their particular information needs. General purpose financial statements are expected to comply with accounting standards. They can be contrasted with 'special purpose financial statements', which will not necessarily comply with accounting standards.

1.2 What is the role of the Australian Accounting Standards Board (AASB) with respect to general purpose financial reporting within Australia?

The AASB releases the accounting standards that are to be applied within Australia by those reporting entities generating general purpose financial statements. Some of the accounting standards released by the AASB are developed within Australia by the AASB. However, the majority of accounting standards released by the AASB are developed away from Australia by the IASB.

1.3 Does the AASB have legal power to enforce accounting standards within Australia?

No. The AASB does not directly have any enforcement powers. Within Australia, it is ASIC that enforces the requirements of the Corporations Act, and it is within the Corporations Act that there is a requirement for particular forms of organisations to comply with accounting standards.

1.4 What is the relevance of the International Accounting Standards Board (IASB) to general purpose financial reporting within Australia?

The IASB is of great relevance to general purpose financial reporting within Australia. The AASB releases accounting standards that have legal force by virtue of the Corporations Act, and the majority of these accounting standards are developed outside of Australia by the IASB.

1.5 What power does the IASB have to enforce the accounting standards that it develops, and which are in use internationally?

The IASB has no power to enforce its accounting standards. It is a standard-setter, not a standard-enforcer. When a country claims that it is adopting IFRSs, it is the responsibility of local regulators to ensure compliance with the accounting standards. Because some countries have minimal enforcement mechanisms in place, together with poor standards of financial statement auditing, any claims that the financial statements being generated in such countries comply with accounting standards are often questionable, and should be met with scepticism.
