 latest diagnostics and treatment strategies Applications of Immunocytochemistry Hesam Dehghani,2012-03-09
 Immunocytochemistry is classically defined as a procedure to detect antigens in cellular contexts using antibodies However
 over the years many aspects of this procedure have evolved within a plethora of experimental setups There are different
 ways to prepare a given specimen different kinds of antibodies to apply different techniques for imaging and different
 methods of analyzing the data In this book various ways of performing each individual step of immunocytochemistry in
 different cellular contexts are exemplified and discussed Applications of Immunocytochemistry offers technical and
 background information on different steps of immunocytochemistry and presents the application of this technique and its
 adaptations in cell lines neural tissue pancreatic tissue sputum cells sperm cells preimplantation embryo arabidopsis fish
 gonads and Leishmania Image-Guided Aesthetic Treatments Robert L. Bard,2023-09-23 This book offers a detailed and
 up to date overview of image guided aesthetic treatments A wide range of aesthetic image guided procedures in different
 body regions are described in more than twenty chapters For each procedure the benefits of image guidance are identified
 and its use is clearly explained The coverage includes all the major tools commonly employed by today s aesthetic and plastic
 surgeons such as spectral imaging laser microfocused ultrasound and radiofrequency technologies Image guidance of
 aesthetic treatments has a variety of benefits Image guided treatment by means of non surgical or minimally invasive
 modalities greatly reduces patient anxiety and the likelihood of postoperative disfigurement Image guidance allows the
 physician to measure the skin thickness and the depth of fat tissue and to evaluate the elasticity of the skin and subcutaneous
 tissues improving thermal treatment outcomes It can also map the arteries veins and nerves thereby providing preoperative
 landmarks and permitting reduction of postoperative bleeding and avoidance of nerve damage Furthermore imaging can non
 invasively identify subdermal fillers or implants assisting in the identification of migration with attendant vascular

compromise or nerve entrapment Image Guided Aesthetic Treatments will be a valuable guide and reference not only for aesthetic practitioners plastic surgeons and other specialists but also for imaging technicians and interested laypersons
