Automated Reasoning and Its Applications Robert Veroff, Gail W. Pieper, 1997 The contributors are among the world's leading researchers in automated reasoning Their essays cover the theory software system design and use of these systems to solve real problems The primary objective of automated reasoning which includes automated deduction and automated theorem proving is to develop computer programs that use logical reasoning for the solution of a wide variety of problems including open questions The essays in Automated Reasoning and Its Applications were written in honor of Larry Wos one of the founders of the field Wos played a central role in forming the culture of automated reasoning at Argonne National Laboratory He and his colleagues consistently seek to build systems that search huge spaces for solutions to difficult problems and proofs of significant theorems They have had numerous notable successes The contributors are among the world's leading researchers in automated reasoning Their essays cover the theory software system design and use of these systems to solve real problems Contributors Robert S Boyer Shang Ching Chou Xiao Shan Gao Lawrence Henschen Deepak Kapur Kenneth Kunen Ewing Lusk William McCune J Strother Moore Ross Overbeek Lawrence C Paulson Hantao Zhang Jing Zhong Zhang

Artificial Intelligence Today Michael J. Wooldridge, Manuela Veloso, 2007-03-06 Artificial Intelligence is one of the most fascinating and unusual areas of academic study to have emerged this century For some AI is a true scientific discipline that has made important and fundamental contributions to the use of computation for our understanding of nature and phenomena of the human mind for others AI is the black art of computer science Artificial Intelligence Today provides a showcase for the field of AI as it stands today The editors invited contributions both from traditional subfields of AI such as theorem proving as well as from subfields that have emerged more recently such as agents AI and the Internet or synthetic actors The papers themselves are a mixture of more specialized research papers and authoritative survey papers The secondary purpose of this book is to celebrate Springer Verlag's Lecture Notes in Artificial Intelligence series

Automated Reasoning and Mathematics Maria Paola Bonacina, Mark E. Stickel, 2013-02-28 This Festschrift volume is published in memory of William W McCune who passed away in 2011 William W McCune was an accomplished computer scientist all around but especially a fantastic system builder and software engineer The volume includes 13 full papers which are presenting research in all aspects of automated reasoning and its applications to mathematics These papers have been thoroughly reviewed and selected out of 15 submissions received in response to the call for paper issued in September 2011 The topics covered are strategies indexing superposition based theorem proving model building application of automated reasoning to mathematics as well as to program verification data mining and computer formalized mathematics

Handbook of Automated Reasoning Alan J.A. Robinson, Andrei Voronkov, 2001-06-22 Handbook of Automated Reasoning
Dictionary of Scientific Principles Stephen Marvin, 2012-11-27 Dictionary of Scientific Principles presents a unique and timeless collection of almost all known rules or laws commonly called principles identified throughout the history

of scientific development their definition and use Exploring a broad range of disciplines the book first lists more than 2 000 principles organized in a standard alphabetical order then provides a list of subject headings for which related principles are identified A staple addition to every library the dictionary will also be of interest to scientists and general readers A *Fascinating Country in the World of Computing* Larry Wos,Gail W. Pieper,1999 This book shows you through examples and puzzles and intriguing questions how to make your computer reason logically The automation of reasoning has advanced markedly in the past few decades and this book discusses some of the remarkable successes that automated reasoning programs have had in tackling challenging problems in mathematics logic program verification and circuit design Because the intended audience includes students and teachers the book provides many exercises as well as tutorial chapters that introduce readers to the field of logic and to automated reasoning in general For more advanced researchers the book presents challenging questions many of which are still unanswered Automated Deduction - CADE-17 David

McAllester,2006-12-30 For the past 25 years the CADE conference has been the major forum for the presentation of new results in automated deduction This volume contains the papers and system descriptions selected for the 17th International Conference on Automated Deduction CADE 17 held June 17 20 2000 at Carnegie Mellon University Pittsburgh Pennsylvania USA Fifty three research papers and twenty system descriptions were submitted by researchers from fifteen countries Each submission was reviewed by at least three reviewers Twenty four research papers and fifteen system descriptions were accepted The accepted papers cover a variety of topics related to theorem proving and its applications such as proof carrying code cryptographic protocol verification model checking cooperating decision procedures program verification and resolution theorem proving The program also included three invited lectures High level verification using theorem proving and formalized mathematics by John Harrison Scalable Knowledge Representation and Reasoning Systems by Henry Kautz and Connecting Bits with Floating Point Numbers Model Checking and Theorem Proving in Practice by Carl Seger Abstracts or full papers of these talks are included in this volume In addition to the accepted papers system descriptions and invited talks this volume contains one page summaries of four tutorials and five workshops held in conjunction with CADE 17
