Abductive Inference Models For Diagnostic Problem Solving Symbolic Computation:

Abductive Inference Models for Diagnostic Problem-Solving Yun Peng, James A. Reggia, 2012-12-06 Making a diagnosis when something goes wrong with a natural or man-made system can be difficult. In many fields such as medicine or electronics a long training period and apprenticeship are required to become a skilled diagnostician. During this time a novice diagnostician is asked to assimilate a large amount of knowledge about the class of systems to be diagnosed. In contrast the novice is not really taught how to reason with this knowledge in arriving at a conclusion or a diagnosis except perhaps implicitly through case examples. This would seem to indicate that many of the essential aspects of diagnostic reasoning are a type of intuition-based common sense reasoning. More precisely diagnostic reasoning can be classified as a type of inference known as abductive reasoning or abduction. Abduction is defined to be a process of generating a plausible explanation for a given set of observations or facts. Although mentioned in Aristotle's work the study of formal aspects of abduction did not really start until about a century ago.

Logic Programming and Nonmonotonic Reasoning Vladimir Lifschitz, 2004-02-12 This book constitutes the refereed proceedings of the 7th International Conference on Logic Programming and Nonmonotonic Reasoning LPNMR 2004 held in Fort Lauderdale Florida USA in January 2004. The 24 revised full papers presented together with 8 system descriptions were carefully reviewed and selected for presentation. Abductive Reasoning Atocha Aliseda, 2006-02-16 Abductive Reasoning Logical Investigations into Discovery and Explanation is a much awaited original contribution to the study of abductive reasoning providing logical foundations and a rich sample of pertinent applications. Divided into three parts on the conceptual framework the logical foundations and the applications this monograph takes the reader for a comprehensive and erudite tour through the taxonomy of abductive reasoning via the logical workings of abductive inference ending with applications pertinent to scientific explanation empirical progress pragmatism and belief revision.
