Between Past And Future Between Past And Future:

Modernism Ástráður Eysteinnsson, Vivian Liska, 2007 The two volume work Modernism has been awarded the prestigious 2008 MSA Book Prize Modernism has constituted one of the most prominent fields of literary studies for decades While it was perhaps temporarily overshadowed by postmodernism recent years have seen a resurgence of interest in modernism on both sides of the Atlantic These volumes respond to a need for a collective and multifarious view of literary modernism in various genres locations and languages Asking and responding to a wealth of theoretical aesthetic and historical questions 65 scholars from several countries test the usefulness of the concept of modernism as they probe a variety of contexts from individual texts to national literatures from specific critical issues to broad cross cultural concerns While the chief emphasis of these volumes is on literary modernism literature is seen as entering into diverse cultural and social contexts These range from inter art conjunctions to philosophical environmental urban and political domains including issues of race and space gender and fashion popular culture and trauma science and exile all of which have an urgent bearing on the poetics of modernity

The Judge and the Spectator Joke Johannetta Hermesen, Dana Richard Villa, 1999 Since early texts as Thinking and Politics Arendt had highlighted the contrast between philosophical and political thinking and compelled herself to find a satisfactory answer to the question how do philosophy and politics relate In her last work Lectures on Kant's Political Philosophy 1982 Arendt analyses the political dimensions of Kant's critical thinking To think critically implies taking the viewpoints of others into account one has to enlarge one's own mind by comparing our judgement with the possible judgements of others While thinking remains a solitary activity it does not cut itself off from all others The essays in this book address the philosophical and moral questions raised by Arendt's attempt to draw out the political implications of critical thinking in Kant's sense In one way or another they all address the place of judgment in Arendt's thought Arendt's turn to Kant and The Critique of Judgment was motivated by her desire to find a form of philosophizing that was not hostile to politics and the public realm But did she really think that Kant's characterization of the judging spectator pointed the way out of the opposition between the universal and the particular between looking at things sub specie aeternitatis and looking at things from a political point of view To what extent did she think that Kant was successful in revealing a mode of thought oriented towards public persuasion yet one which retained its critical independence Each of the essays wrestles with the complexities of a complex thinker They remind us that critical thinking or Selbstdenken is among the most difficult and rare arts even though it is an art potentially accessible to everyone They also remind us that Hannah Arendt was a virtuoso of this art and of how her example points the way toward a renewal of judgment as the political faculty par excellence

The Political Humanism of Hannah Arendt Michael H. McCarthy, 2012-08-17 At the end of the Second World War when the horror of the holocaust became known Hannah Arendt committed herself to a work of remembrance and reflection Intellectual integrity demanded that we comprehend and articulate the genesis and meaning of totalitarian terror What

earlier spiritual and moral collapse had made totalitarian regimes possible What was the basis of their evident mass appeal To what cultural resources and political institutions and traditions could we turn to prevent their recurrence After years of profound study Arendt concluded that the deepest crisis of the modern world was political and that the enduring appeal of political mass movements demonstrated how profound that crisis had become For Arendt the modern political crisis is also a crisis of humanism The radical totalitarian experiment was rooted in two distorted images of the human being The agents of terror believed in the limitless power generated by strategic organization a power exercised without restraint and justified by appeal to historical necessity The victims of terror by contrast were systematically dehumanized by the ruling ideology and then brutally deprived of their legal rights and their moral and existential dignity Arendt's political humanism directly challenges both of these distorted images the first because it dangerously inflates human power the second because it deliberately subverts human freedom and agency This book offers a dialectical account of the political crisis that Arendt identified and shows why her interpretation of that crisis is especially relevant today The author also provides detailed analysis and appraisal of Arendt's political humanism the revisionary anthropology she based on the politically engaged republican citizen Finally the work distinguishes the merits from the limitations of Arendt's genealogical critique of our tradition of political thought showing that she tended to be right in what she affirmed and wrong in what she excluded or omitted

Diverging Time David Carvounas, 2002-01-01 Temporal divergence creates a need for new narratives and paradigms In *Diverging Time* David Carvounas supports this assertion through detailed expository and diagnostic readings of Kant Hegel and Marx He focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present Despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose This book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that Kant Hegel and Marx delineate in distinctive and powerful ways

Proceedings of the ... World Congress of the International Association for Philosophy of Law and Social Philosophy (IVR)

Internationale Vereinigung für Rechts- und Sozialphilosophie, 2004 *Introduction to Anticipation Studies* Roberto Poli, 2017-08-28 This book presents the theory of anticipation and establishes anticipation of the future as a legitimate topic of research It examines anticipatory behavior i.e. a behavior that uses the future in its actual decisional process The book shows that anticipation violates neither the ontological order of time nor causation It explores the question of how different kinds of systems anticipate and examines the risks and uses of such anticipatory practices The book first summarizes the research on anticipation conducted within a range of different disciplines and describes the connection between the anticipatory point of view and futures studies Following that its chapters on Wholes Time and Emergence make explicit the

ontological framework within which anticipation finds its place It then goes on to discuss Systems Complexity and the Modeling Relation and provides the scientific background supporting anticipation It restricts formal technicalities to one chapter and presents those technicalities twice in formal and plain words to advance understanding The final chapter shows that all the threads presented in the previous chapters naturally converge toward what has come to be called Discipline of Anticipation

Postnational Constitutionalism Paul Linden-Retek,2023-03-29 At a time when the integration of the European Union's peoples through the rule of law is faltering this book develops a critical theory of postnational constitutionalism Today widely held conceptions of EU law continue to mislead citizens about the nature of political identity sovereignty and agency They lose sight of a critical idea on which post nationalism depends that constitutional self authorship is narrative and the polity is a subject whose identity history and legacy are still in formation Absent this vision EU law reproduces crises of legitimacy the depoliticization of public life emergency rule by executive decree a collapse of solidarity and the rise of nativist movements The book diagnoses this impasse as the product of a problem familiar to modernity reification a process in which social and historical relationships are misattributed as timeless relations among things Reification's shrinking of social dilemmas moral principles and political action to narrow perceptions of the present explains law's role in perpetuating crisis But this diagnosis also points to a remedy It suggests that to sustain the emancipatory potential of EU constitutionalism we must recover law's relationship to time Postnational Constitutionalism Europe and the Time of Law proposes a temporally attuned constitutional theory with principles of anti reification narrative interpretation and non sovereign agency at its centre These principles reimagine essential domains of constitutional order social integration constitutional adjudication and constituent power Spanning various bodies of EU jurisprudence the book devotes particular attention to migration and asylum struggles where questions of solidarity law and belonging are most generative and acute

Yoga : The Supreme Science Osho,2009 Drawing on the teachings of Patanjali Osho gives an entirely new perspective on the fundamental questions of life the nature of heaven religion and God For Osho it is not a question of being good or bad or of a God in the sky but of each individual becoming aware of his being and attaining kaivalya the ultimate state of enlightenment when the meditator goes beyond all desire This process draws on the inner science of yoga

Routine Dynamics Christian A. Mahringer,Brian T. Pentland,Birgit Renzl,Kathrin Sele,Paul Spee,2024-07-22 Exploring the power of routines in navigating our increasingly complex world this volume argues that routines are as much engines of change as they are of stability and that organizations are in a position to benefit from both

Physical Theory Lawrence Sklar,2014 In nine new essays distinguished philosophers of science discuss outstanding issues in scientific methodology especially that of the physical sciences and address philosophical questions that arise in the exploration of the foundations of contemporary science
