Beyond Quality An Agenda For Improving Manufacturing Capabilities In Developing Countries:

Beyond Quality Steven R. Wilson, Robert Ballance, János Pogány, 1995 Global manufacturing has been altered by the emergence of a new approach to production which differs radically from the principles of mass production This approach has been characterised by successful manufacturers in Asia and the West who have engaged in a continuous process to improve quality process productivity and cost performance The authors of *Beyond Quality* argue that many of the methods used by these new firms are equally suitable for manufacturers in developing countries and the transition economies of eastern and Central Europe Using case study material from Latin America Africa and Central Europe the authors demonstrate that it is the skill and organization of people rather than sophisticated equipment which determines growth in productivity and product quality These new forms of improvement are not dependent on economies of scale and so provide small producers with the flexibility to compete effectively against mass producers *Ibss: Economics: 1995* Compiled by the British Library of Political and Economic Science at the London School of Economics, 1996 The IBSS is the essential tool for librarians university departments research institutions and any public or private institutions whose work requires access to up to date and comprehensive knowledge of the social sciences *Technology, Innovation and Industrial Economics: Institutional Perspectives* Dilmus D. James, John W. Mogab, 2012-12-06 Technology Innovation and Industrial Economics Institutional Perspectives inspired by the work of William E Cole Professor Emeritus at the University of Tennessee at Knoxville extends his work with essays on technology innovation and industrial economics from an Institutional perspective The managerial style innovational practices and industrial setting of the continuous improvement firm are central to several chapters This volume also features innovation and technology in Latin America Adam Smith s writing on entrepreneurship and a comparison of American and European Institutionalism The topics of technology innovation industrial organization and industrial policy are being widely discussed and debated in today s literature but seldom from an Institutional perspective The purpose of this book is to reduce substantially this missing dimension in the ongoing debates on these important issues
