Volume 1: Your Second Year Study

Properties of Solids

- **Crystalline Solids:** Atoms, ions, or molecules are arranged in a regular, repeating three-dimensional pattern. They have sharp melting points and distinct X-ray diffraction patterns.
- **Amorphous Solids:** Atoms, ions, or molecules are arranged in a disordered, non-repeating pattern. They do not have sharp melting points and do not show distinct X-ray diffraction patterns.
- **Intermolecular Forces:** The strength of these forces determines the melting point and other physical properties of a solid.
 - **London Dispersion Forces:** Present in all solids, they are the weakest intermolecular forces.
 - **Dipole-Dipole Interactions:** Present in polar solids, they are stronger than London forces.
 - **Hydrogen Bonding:** Present in solids containing N-H, O-H, or F-H bonds, they are the strongest intermolecular forces.
- **Unit Cells:** The smallest repeating unit of a crystal lattice. Common types include simple cubic, body-centered cubic (BCC), and face-centered cubic (FCC).
- **Packing Efficiency:** The fraction of space occupied by atoms in a unit cell. FCC and HCP have the highest packing efficiency (74%), while BCC has a lower efficiency (68%).

Types of Chemical Calculations

Key to Success on the Exam

- **Stoichiometry:** Calculations involving the relative amounts and masses of substances in a chemical reaction.
- **Thermochemistry:** Calculations involving heat energy changes during chemical reactions.
- **Equilibrium:** Calculations involving the concentrations of reactants and products at equilibrium.
- **Acid-Base:** Calculations involving pH, pKa, and the concentrations of acids and bases.
- **Solubility:** Calculations involving the concentrations of ions in saturated solutions.
- **Electrochemistry:** Calculations involving cell potentials, Gibbs free energy, and the amount of substance produced or consumed in an electrochemical cell.

Periodic Table & Trends

Diagram illustrating the periodic table with trends for atomic radius, ionization energy, and electronegativity.

- **Atomic Radius:** Increases from top-left to bottom-right.
- **Ionization Energy:** Increases from bottom-right to top-left.
- **Electronegativity:** Increases from bottom-right to top-left.

Electronegativity Table

- **Electronegativity:** A measure of an atom's ability to attract electrons in a chemical bond.
- **Trends:** Electronegativity increases from bottom-left to top-right.
- **Pauling Scale:** The most common scale for electronegativity, ranging from 0.7 to 4.0.

Diagram illustrating the periodic table with electronegativity values.

- **London Dispersion Forces:** Induced by temporary dipoles.
- **Dipole-Dipole Interactions:** Between permanent dipoles.
- **Hydrogen Bonding:** A special type of dipole-dipole interaction involving N, O, or F.

Thermodynamics

First Law of Thermodynamics: Energy is conserved. $\Delta E = q + w$

Second Law of Thermodynamics: The entropy of the universe increases for a spontaneous process.

Gibbs Free Energy: $\Delta G = \Delta H - T\Delta S$. $\Delta G < 0$ indicates a spontaneous process.

Equilibrium & Solubility

Equilibrium Constant: $K = \frac{[products]}{[reactants]}$

Le Chatelier's Principle: A system at equilibrium will shift to counteract a change in conditions.

Solubility Product: K_{sp} is the equilibrium constant for the dissolution of a solid.

Table of equilibrium constants for various reactions.

Acid-Base Equilibrium: K_a and K_b are equilibrium constants for acid and base dissociation.

Common Ion Effect: The addition of a common ion to a solution shifts the equilibrium.

Buffer Solutions: Solutions that resist changes in pH.

Electrochemistry

Standard Cell Potential: $E^\circ_{cell} = E^\circ_{cathode} - E^\circ_{anode}$

Gibbs Free Energy: $\Delta G^\circ = -nFE^\circ_{cell}$

Nernst Equation: $E = E^\circ - \frac{RT}{nF} \ln Q$

Basic/Weak Substances

Basic/Weak Substances: Substances that can accept or donate protons.

Conjugate Acid-Base Pairs: $HA \rightleftharpoons H^+ + A^-$

pH and pKa: $pH = -\log[H^+]$, $pKa = -\log[K_a]$

Titration Curves: Graphs showing pH vs. volume of titrant added.

Indicator Selection: Choose an indicator whose color change occurs at the equivalence point.

Buffer Capacity: The ability of a buffer to resist pH changes.

only one facet of the questions may be discussed numerous factual errors may appear 3 The thesis is weak evidence provided in support does not apply to the thesis factual errors are apparent 2 The thesis is very weak little or no factual evidence is provided to support the thesis irrelevant and inaccurate information appears 1 An attempt is made to answer the question but the support given is insignificant and the coverage of topics is incomplete 0 The question is not answered with any significance

It would be extremely helpful to find someone who is willing to score your essay your teachers or anyone who is familiar with the test material If you do ask the person to assign each of your U S and Comparative Part I essays a score of 0 to 9 For your Comparative Part II essays use the 0 to 5 scale If you must grade your own essays try to be objective In addition you may want to give your essays three different grades For instance if you feel you did well try giving the essay a score of 5 6 or 7 to represent the various scores you may receive By underestimating what your score may be you are more likely to receive a better score on the actual exam Use the following formulae to determine your raw score for the Free Response section

United States Exam Free Response Response 1 score x 1 66 raw score Response 2 score x 1 66 raw score Response 3 score x 1 66 raw score Response 4 score x 1 66 raw score Comparative Exam Response 1 score x 1 66 raw score Response 2 score x 1 66 raw score Response 3 score x 3 raw score Response 4 score x 3 raw score

The Composite Score Once you have obtained your raw scores for both the Multiple Choice and the Free Response sections add the scores together to get your composite score

United States Exam Multiple Choice raw score Free Response raw score composite score round to nearest whole number

Score Essay 1 Score Essay 2 Score Essay 3 Score Essay 4 raw score

Comparative Exam Multiple Choice raw score Free Response raw score composite score round to nearest whole number

Studying for Your AP Examination It is never too early to start studying The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material It is very important for you to choose the time and place for studying that works best for you Some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep Other students may study during the day while waiting on a line or even while eating lunch Only you can determine when and where your study time will be most effective But be consistent and use your time wisely Work out a study routine and stick to it When you take the practice exam s try to make your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet table free from distraction Make sure to time yourself As you complete the practice test s score your test s and thoroughly review the explanations to the questions you answered incorrectly but do not review too much during any one sitting Concentrate on one problem area at a time by reviewing the question and explanation and by studying our review s until you are confident that you completely understand the material Since you will be allowed to write in your test booklet during the actual exam you may want to write in the margins and spaces of this book when practicing However do not make miscellaneous notes on your answer sheet Mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering Keep track of your scores By doing so you will be able to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover the topics causing you difficulty as this will build your skills in those areas To get the most out of your studying time we recommend that you follow the Study Schedule which corresponds to the exam you are taking It details how you can best budget your time If you are taking both exams do not try to study for each at the same time Try alternating days by studying for the United States exam one day and the Comparative exam the next

Test Taking Tips Although you may be unfamiliar with tests such as the Advanced Placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Listed below are ways to help yourself become accustomed to the AP exam some of which may also be applied to other standardized tests Become comfortable with the format of the AP Examination in Government and Politics that you are taking When you are practicing to take the exam s simulate the conditions under which you will be taking the actual test s You should practice under the same time constraints as well Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid nervousness and the mistakes caused by being nervous Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you can go back to the ones you have

skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one quarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the circle that corresponds to the number of the question in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off your score
