

## APA (6<sup>th</sup> edition) Referencing Style

This referencing style sheet is to be used in conjunction with the Library's general Guide to Citing & Referencing. The information is based on the following manual from the American Psychological Association (APA):

American Psychological Association. (2010). *Publication manual of the American Psychological Association* (6th ed.). Washington, DC: Author.

### For help with referencing items not covered in this guide:

You might like to refer to either the *Publication manual of the American Psychological Association* (6th ed.) or the more compact version, *Concise rules of APA style* (6<sup>th</sup> ed.). Both manuals are available in the Library, on Level 3, at shelf mark 808.06615 AME. You can also access the following ebook via the Library Catalogue: [The complete guide to referencing and avoiding plagiarism](#) - this includes examples for APA and other styles.

### Citation

The APA uses an author-date style of referencing with details entered in round brackets, for example:

The traditional approach to human cognition is over-simplified in assuming that processing is typically serial (Eysenck & Keane, 2010).

**Treatment of multiple authors:** when a work has two authors, cite both authors every time. When a work has three, four or five authors, cite all authors the first time a reference occurs. In subsequent citations, include only the surname of the first author followed by et al. See:

Kisangau, Lyanuu, Hosea, and Joseph (2007) found that ... [first time cited]

Kisangau et al. (2007) found that ... [subsequent citations]

When a work has six or more authors, cite only the surname of the first author followed by et al. and the year of publication for the first and subsequent citations.

### Reference list

The reference list should contain full details of all the sources mentioned in your text, arranged alphabetically by surname of first author.

### Reference examples

Below are some examples of the more common types of document you might want to reference. Each gives the APA 6th ed. format for the reference, followed by an example. **Treatment of multiple authors within reference list:** when authors number eight or more, include the first six authors' names then insert three ellipses and add the last author's name. For example:

Kisangau, A., Lyanuu, B., Hosea, C., Joseph, D., Rogers, T., Tylee, C., . . . Humphreys, L. J. (2007). *Psychology*. Birmingham: ABC Press.

**Counselor Education** Carl J. Sheperis, R. J. Davis, 2015-12-01 Online Counselor Education A Guide for Students is an all new guide for online students in counselor education programs Students in online environments face a number of challenges that could put them at a disadvantage unless they have a resource to help guide them through some of the confusing aspects of an online environment Such challenges include the lack of understanding surrounding graduate school performance

expectations balancing graduate school and life the inability to connect with community members and local field agencies and various other aspects unique to an online environment This text will help students through these challenges and act as an invaluable resource *na*, Axelrod & Cooper's Concise Guide to Writing Rise B. Axelrod, Charles R.

Cooper, 2011-10-19 Adapted from the best selling St Martin s Guide to Writing Axelrod and Cooper s Concise Guide to Writing provides streamlined versions of the chapters covering six of the most commonly assigned genres in the first year writing course remembering events writing profiles explaining concepts arguing a position proposing a solution and justifying an evaluation The careful integration of well chosen readings with guided writing instruction in these chapters is complemented by coverage of strategies for reading writing and research in brief but complete chapters at the end of the book Read the preface Research Methods in Applied Settings Jeffrey A. Gliner, George A. Morgan, Nancy L.

Leech, 2011-03-17 Through its integrated approach to quantitative research methods this text teaches readers how to plan conduct and write a research project and select and interpret data so they can become better consumers of research This is not a statistics book there are very few formulas Rather this book helps students master which statistic to use when and how to interpret the results Organized around the steps one takes in conducting a research project this book is ideal for applied programs and for those who want to analyze and evaluate research articles Having taught in a variety of departments the authors have a good grasp of the research problems faced by master s and doctoral students in diverse areas of the behavioral and social sciences Text adopters applaud the book s clarity Students are often confused by other texts use of inconsistent terminology To avoid this confusion the authors present a semantically consistent picture that emphasizes five

research approaches randomized experimental quasi experimental comparative associational and descriptive The authors then show how these approaches lead to three kinds of research designs which in turn lead to three groups of statistics with the same names This consistent framework increases comprehension and the ability to apply the material Numerous applied problems annotated examples and diagrams and tables further promote comprehension Although the book emphasizes quantitative research the value of qualitative research is introduced This extensively revised edition features more than 50% new material including A new chapter on the evidence based approach that emphasizes the importance of reporting confidence intervals and effect sizes and the increased use of meta analysis An increased emphasis on evaluating research including an 8 step plan for evaluating research validity Chs 23 24 and its application to the 5 sample studies used throughout the book Ch 25 Lots of practical advice on planning a research project Ch 2 data collection and coding Ch 15 writing the research report Ch 27 questions to use in evaluating a research article Appendix E and creating APA tables and figures Appendix F A new chapter on non experimental approaches designs Ch 7 including qualitative research Web resources for students including critical thinking problems with answers and a sample outline of a research proposal An earlier and expanded introduction to measurement reliability and validity to further emphasize their differences and importance An extensively revised chapter on measurement validity consistent with the latest APA AERA NCME standards Fewer chapters on inferential statistics with an increased focus on how their selection is related to the design of the study and how to interpret the results using significance testing and effect sizes and confidence intervals Instructor s Resources with Power Points test questions answers to the application questions and more Intended for graduate research or quantitative experimental methods design courses in psychology education human development and family studies and other behavioral social business and health sciences independent sections and chapters can be read in many orders allowing for flexibility in assigning topics Due to its practical approach this book also appeals to researchers and clinicians Prior exposure to statistics and research methods is recommended      The SAGE Guide to Writing in Criminal Justice Steven
