A320 Fcom 2014:

Aviation and Its Management Arif Sikander, 2019-05-22 Aviation has grown leaps and bounds within the last decade. Aviation courses and training at all levels have shown an exponential increase around the globe. There has been a restricted focus on writing books in this sector of the economy mainly due to the shortage of expertise in this specialist and complex area. This book was written with the purpose of meeting this need of the aviation sector. Due to the diversified nature of aviation knowledge which includes flying, engineering, airports, allied trades for aircraft and airports, airline and airport management and operations education etc, one text alone will not suffice and do justice to address all these areas. It is envisaged to develop subsequent parts of this book to cover all these knowledge areas. This book is the first installment of any subsequent books and explores issues including airline management and operations, airline business models, airport systems, flight operational procedures, aircraft maintenance, runway safety management systems and air traffic management. In particular, attention will be given to aspects such as analysis of air traffic in a domestic market, runway safety management systems, critical success factors for multiple MRO service providers, key pain points of the industry to be addressed to move into the future, new research on hub airports for international flights, new business models for airlines and runway safety management systems. This book is useful to aviation managers, educators, students and professionals interested in any of the above issues. [AIR CRASH INVESTIGATIONS: MIRACLE ON THE HUDSON RIVER: The Ditching of US Airways Flight 1549](#)

Pete Collins, Editor, 2014-04-22 On January 15, 2009, about 1527 eastern standard time, US Airways flight 1549, an Airbus Industrie A320-214 N106US, experienced an almost complete loss of thrust in both engines after encountering a flock of birds and was subsequently ditched on the Hudson River about 8.5 miles from LaGuardia Airport, LGA, New York City, New York. The flight was en route to Charlotte Douglas International Airport, Charlotte, North Carolina, and had departed LGA about 2 minutes before the in-flight event occurred. The 150 passengers and 5 crewmembers evacuated the airplane via the forward and overwing exits. One flight attendant and four passengers were seriously injured and the airplane was substantially damaged beyond repair. The National Transportation Safety Board determines that the probable cause of this accident was the ingestion of large birds into each engine, which resulted in an almost total loss of thrust in both engines and the subsequent ditching on the Hudson River. [Angle d'attaque](#) Roger Rapoport, Shem Malmquist, 2019-05-30 T00:00:00-04:00 Vous n'avez pas besoin d'être un pilote pour trouver ce livre mouvant et captivant. Les auteurs expliquent clairement la série d'événements qui ont fait toute la différence entre les centaines de milliers de vols sécurisés et routiniers et ceux qui ont tourné au drame. Le 1er juin 2009 s'abîmait en mer le vol Air France 447. La chute de l'Airbus 330 qui effectuait la liaison Rio-Paris tua la vie des 228 passagers et membres d'équipage devenant ainsi la plus grande catastrophe de l'aviation française. L'occasion du 10e anniversaire de la tragédie, Roger Rapoport, journaliste d'investigation et Shem Malmquist, commandant de bord, instructeur et enquêteur accident, apportent un éclairage inédit sur les causes et conséquences de cet accident. Un ouvrage
