Undoing Ethics Natasha Whiteman, 2012-01-06 Over the past decade researchers from different academic disciplines have paid increasing attention to the productivity of online environments The ethical underpinnings of research in such settings however remain contested and often controversial As traditional debates have been reignited by the need to respond to the particular characteristics of technologically mediated environments researchers have entered anew key debates regarding the moral legal and regulative aspects of research ethics A growing trend in this work has been towards the promotion of localized and contextualized research ethics the suggestion that the decisions we make should be informed by the nature of the environments we study and the habits expectations of participants within them Despite such moves the relationship between the empirical theoretical and methodological aspects of Internet research ethics remains underexplored Drawing from ongoing sociological research into the practices of media cultures online this book provides a timely and distinctive response to this need This book explores the relationship between the production of ethical stances in two different contexts the ethical manoeuvring of participants within online media fan communities and the ethical decision making of the author as Internet researcher manoeuvring as it were in the academic community In doing so the book outlines a reflexive framework for exploring research ethics at different levels of analysis the empirical settings of research the theoretical perspectives which inform the researcher's objectification of the research settings and the methodological issues and practical decisions that constitute the activity as research The analysis of these different levels develops a way of thinking about ethical practice in terms of stabilizing and destabilizing moves within and between research and researched communities The analysis emphasizes the continuities and discontinuities between both research practice and online media fan activity and social activity in on and offline environments

Parliamentary Debates (Hansard). Great Britain. Parliament. House of Commons, 1998 Canines Lauryn E. DeGreeff, Craig A. Schultz, 2022-01-30 Detection canines have been utilized throughout the world for over a century and while numerous attempts have been made to replicate the canine's ability to detect substances by mechanical means none has been as successful The olfactory system is a highly intricate and sophisticated design for chemical sensing and the olfactory capacity of many animals including canines is considered unmatched by machine due to not only their great sensitivity and superior selectivity but also their trainability and mobility These unique features have led to the use of such animals as whole animal biosensors Amplifying the benefits and diminishing the limitations of detection canines interdisciplinary research is crucial to understanding canine olfaction and detection and enhancing this powerful and complex detector The past 50 years have produced vast advancements in animal behavior training technology to develop canines into more proficient and reliable sensors while scientific research has provided tremendous support to help practitioners better understand how to

utilize this powerful sensor This book assembles a diverse group of authors with expertise in a variety of fields relating to detection canines and the chemical sensing industry including both research and operational perspectives on detection canines It illustrates how science enhances our understanding of how canines are employed for solving some of the world's leading detection challenges **Entender la labor policial. Wildlife Crime Great Britain: Parliament: House of Commons: Environmental Audit Committee,2012-10-18 Wildlife legislation has become so complex that prosecutions fail and even specialist enforcement professionals struggle to implement it effectively Hundreds of birds of prey have been deliberately poisoned with substances such as carbofuran that have no legal use and the Government could easily make possession an offence The lack of sentencing guidelines on wildlife offences means that some offenders are being neither punished nor deterred in the courts The CPS is also failing to train its prosecutors to handle complex wildlife cases Furthermore the inflexible implementation in UK law of international agreements covering the trafficking of endangered species squanders limited resources The Government has maintained funding for specialist wildlife crime investigation and enforcement but this is provided on an ad hoc basis reducing operational effectiveness Funding provided to monitor wildlife crime on the internet was too short term to attract a suitably qualified individual to fill the post In 2004 the Committee called for a new database to record all wildlife crime but this has still not been introduced Internationally this report also examines how the rhino tiger and elephant are being driven to extinction by growing demand for illegal wildlife products in south east Asia and China The Government needs to exert robust diplomatic pressure in favour of the development and enforcement of wildlife law at the next CITES meeting in March 2013 In particular the Government should focus attention on the damaging effect of one off sales of impounded ivory which has been found to actually fuel demand for ivory products and seek an unequivocal international ban on all forms of ivory trade **The Oxford Handbook of Politics and Performance** Shirin Rai,Milija Gluhovic,Silvija Jestrovic,Michael

Saward,2021 While political scientists and political theorists have long been interested in social and political performance and theatre and performance researchers have often focused on the political dimensions of the live arts the interdisciplinary nature of this labor has typically been assumed rather than rigorously explored This volume brings together leading scholars in the fields of Politics and Performance drawing on experts across the fields of literature law anthropology sociology psychology and media and communication as well as politics and theatre and performance to map out and deepen the evolving interdisciplinary engagement Organized into seven thematic sections the volume investigates the relationship between politics and performance to show that certain features of political transactions shared by performances are fundamental to both disciplines and that to a large extent they also share a common communicational base and language **Civil Liberties** S. H. Bailey,David John Harris,David C. Ormerod,2001 Bailey Harris and Jones Civil Liberties Cases and Materials is widely recognised as rendering the study of a formidable subject area accessible It supplies the reader with a masterly collection of

materials and commentary on all major aspects of the law relating to civil liberties in England and Wales and has become firmly established as a standard text for students on civil liberties and constitutional law courses **Policing of the G20 Protests** Great Britain: Parliament: House of Commons: Home Affairs Committee, 2009-06-29 The policing of the G20 Protests in April 2009 was a remarkably successful operation more than 35 000 protesters demonstrated in the centre of London with a police presence of several thousand yet there was a minimum of disruption Aside from a few high profile incidents the policing of the G20 Protests passed without drama However these incidents and the tactics that led to them caused considerable adverse comment and have the potential to damage the public's faith in the police The use of containment detaining people in a confined area for a sustained period of time and distraction tactics the controlled use of force against those who appear hostile while legitimate according to the police rule book shocked the public Whether they should continue to be used must form the basis of a wide ranging discussion on the future policing of public protests Police communications with the media and the protesters must also improve This would require the police media and protesters to engage better with one another both before and during the protest There are no circumstances in which it is acceptable for officers not to wear identification numbers and urgent action must be taken to ensure that officers have the resources to display identification at all times those officers found to be consciously removing their identification numbers must face the strongest possible disciplinary measures While the vast majority of officers on duty performed very well the Committee is concerned that untrained and inexperienced officers were placed in such a highly combustible atmosphere It cannot condone the use of untrained inexperienced officers on the front line of a public protest and feel that an element of luck must be attributed to the success of the operation **Distance Teaching for the Third World** ,1991
