Unrealized Digital Democracy Garrett Pierman, 2023-09-25 Garrett Pierman argues that the Internet as it is structured today is inhospitable to democracy What began as a government funded defense project became with the commercialization of the Internet in the early 1990s a network that makes it simultaneously easier for falsehoods to spread and more difficult for people to lose touch with reality Many millions of Internet users have not encountered the online world as many scholars had hoped as a place for careful democratic deliberation The Internet is now a platform in which their fears and anxieties are exploited by corporations that have carved up digital fiefdoms In these digital fiefdoms fake news and lies are shared and consumed at speeds that far exceed our ability to sort fact from fiction leading to instances of political violence once people's lie based fears overcome their better judgement It should be of no surprise that the current Internet enables and encourages political violence scared and overwhelmed users are the ideal denizens of digital fiefdoms **Worth's Greatest Stock**
