Russell,2020-09-08 Innovation is the hottest buzzword in business But what if our obsession with finding the next big thing has distracted us from the work that matters most The most important book I ve read in a long time It explains so much about what is wrong with our technology our economy and the world and gives a simple recipe for how to fix it Focus on understanding what it takes for your products and services to last Tim O Reilly founder of O Reilly Media It s hard to avoid innovation these days Nearly every product gets marketed as being disruptive whether it s genuinely a new invention or just a new toothbrush But in this manifesto on thestate of American work historians of technology Lee Vinsel and Andrew L Russell argue that our way of thinking about and pursuing innovation has made us poorer less safe and ironically less innovative Drawing on years of original research and reporting The Innovation Delusion shows how the ideology of change for its own sake has proved a disaster Corporations have spent millions hiring chief innovation officers while their core businesses tank Computer science programs have drilled their students on programming and design even though theoverwhelming majority of jobs are in IT and maintenance In countless cities suburban sprawl has left local governments with loads of deferred repairs that they can t afford to fix And sometimes innovation even kills like in 2018 when a Miami

bridge hailed for its innovative design collapsed onto a highway and killed six people In this provocative deeply researched book Vinsel and Russell tell the story of how we devalued the work that underpins modern life and in doing so wrecked our economy and public infrastructure while lining the pockets of consultants who combine the ego of Silicon Valley with the worst of Wall Street s greed The authors offer a compelling plan for how we can shift our focus away from the pursuit of growth at all costs and back toward neglected activities like maintenance care and upkeep For anyone concerned by the crumbling state of our roads and bridges or the direction our economy is headed *The Innovation Delusion* is a deeply necessary reevaluation of a trend we can still disrupt *Circular Economy Opportunities and Pathways for Manufacturers* Henrik Hvid Jensen,2025-03-11 In today s rapidly evolving manufacturing landscape the future competitiveness for manufacturers hinges on three interlinked paradigms 1 Circular Economy Models for Zero Waste Product Lifecycles The shift from traditional linear models to circular ones is increasingly crucial Circular strategies extend product lifecycles optimize resource use and open new revenue streams ultimately bolstering resilience competitiveness and customer relationships 2 Sustainable Manufacturing Through Decarbonization As global awareness around sustainability grows the push toward decarbonized manufacturing processes is no longer optional Such an approach minimizes environmental impact while aligning with international sustainability goals 3 Digital Enablement for Paradigm Transformation Digitization serves as the lynchpin in realizing cleaner manufacturing and circular economy objectives Tools like the Digital Product Passport DPP empower manufacturers to achieve transparency encourage collaboration and create unmatched business value expediting the transition to sustainable and circular manufacturing One of the most pressing challenges for manufacturers today is achieving the transition to cleaner and circular business models in a financially viable way This book delves deeply into the business opportunities circularity presents and the pivotal role of digital solutions in enabling a smooth and cost effective transition It emphasizes how digitization can address economic feasibility concerns while driving operational efficiency and sustainability By breaking down these critical elements the book provides actionable insights and frameworks serving as a practical guide for manufacturers striving to align economic priorities with environmental and operational demands ensuring long term competitiveness and resilience Visit <https://circularpathwaysbook.com> to continue your journey **A Civil Service Manual: Geography; civil government; Spelling** Joseph Archibald Ewart,Wilbur Stanwood Field,Adelbert Harland Morrison,1912 **InfoWorld** ,1979-06-25 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects InfoWorld ,1984-07-23 InfoWorld is targeted to Senior IT professionals Content is segmented into Channels and Topic Centers InfoWorld also celebrates people companies and projects
